STATE POLICE SAY:

Watch your "Danger Zone"—Your danger zone is the distance in which you cannot stop safely. It varies with the weather, the roadway, the speed at which you are traveling, the condition of your brakes, and your own physical condition. Drive so that you will have full control of your car in the event of any emergency.

## in the name of LIFE...

"A STOP sign on a road means just what it says—STOP your car and make certain that you have a clear right of way before continuing.

"It won't hurt you to stop for the few seconds needed to make sure you will be safe. It may hurt you plenty if you don't. It may even kill you.

"Like this accident. A driver thought he was smarter than the combined experience of men who make safety their lifework... who plan just where to put these STOP

signs by figuring every angle of traffic and road conditions. He disregarded the warning. Drove his car into the main road without even slowing down—smack into another car that couldn't get out of the way in time. He will never drive again. And two youngsters in the second car were hurt.

"Another traffic tragedy that could have been avoided. If you are driving on a through highway and are coming to a cross road—slow down. When you come to a STOP road—STOP in the name of life."

*We—you and I and the man next door—can cut traffic accidents to a minimum if we drive and walk safely. Probably there will always be a certain number of people who will be criminally careless of the rights of the other fellow—and they drive that way. The vast majority of us want to live and let live. Let's all get together on this—with the right attitude. Let's be as courteous when we drive as we are in other everyday contacts with people. Then all of us can lick traffic accidents.*
