Atomic Movie Maker

"God of the Atom", a full-color scientific film depicting the atomic bomb problem, will be shown Thursday, May 27 at 7:45 p. m. at Shavertown Bible Church, according to Rev. Russell W. Edmondson, pastor.

In the 45-minute movie, produced by Dr. Irwin A. Moon in Los Angeles laboratories of Moody Institute of Science, scientific apparatus and diagrams are used to demonstrate the theory of atomic power. Actual on-the-spot film records of the Nagasaki and Bikini blasts show the atom bomb in action.

The film concludes with the presentation of the world crisis caused by the discovery of atomic power, and offers a unique solution. Since its release last September, more than 75,000 people have seen the film in American schools and churches each month.

An exclusive feature is a sequence portraying the giant 184 inch cyclotron at the University of California.

"There is no defense against an attack by an atomic weapon," says Dr. Moon, narrator of the film. "Scientists have predicted that fewer than 10 per cent of those now living would escape such destruction."

The only way to avoid such a possibility, he concludes, is a return to belief in God as a dynamic for ethical living.

Helping Dr. Moon in the narration is Larry Johnston, young physicist, who aided in atomic development at Los Alamos and photographed all three wartime bombs as they exploded.

The public is cordially invited.
