(Doubleheader)

Shavertown, by virtue of its double header victory over Falls,

climbed into first place with a record of six straight wins. . . . Noxen follows close on its heels with a 5-0 record. . . . Harding, the surprise team of the year—the team that finished at the bottom last year—is in third place with four wins against one loss. . . . Vernon's 3-2 upset of Orange boosted it into the number four spot.

Top games on Sunday are the Dallas-Shavertown and the Orange-Vernon tussles. . . . These teams have met previously with Shavertown and Vernon coming out on top. . . . However, we are going out on a limb and picking Dallas and Orange to turn the tables this time and come home with a victory. Orange and Dallas, both powerhouse teams and potentially top place squads are off form so far this season and will have to do some fancy stepping to stay in the race.

Two major upsets took place Memorial Day. Vernon shaded Orange 3-2 and East Dallas took Dallas 4-2. . . . Although Orange outthit Vernon 8 to 5 it was unable to

score after it went into a 2-0 first inning lead on A. Bellas' homer with one man on. . . . Danny Gultus had two hits for Vernon while Brace, A. Bellas and Paul Kunkle had two each for Orange. . . . Vogrin was the winning pitcher and Evans the loser.

Jackson smashed Osterhout 17-0. Pat Salansky and A. Levi led the 19 hit attack with three hits each. Salansky also came through with a home run. J. Levi helped his own cause with two hits as did J. Urlick, Fedor and Walters. F. Kenia connected for three for his team's six hits. J. Levi was the winning pitcher while Don Kester was the loser.

Heating Plant Needs Tonic After Long Hard Winter

Fuel merchants and heating equipment salesmen report that far fewer heating complaints are received from home owners whose heating plants are kept clean and in condition by regular "Summer Service."

Get this work done as early as possible this summer to prevent combined soot and moisture from attacking heating surfaces with resultant corrosion and rust. If this work is put off until the start of the heating season this fall then the heating equipment will be subject to harmful corrosion and rust all during the summer months.

When a furnace or boiler is cleaned by a qualified heating service firm, the service includes inspection for all necessary adjustments and repairs, as well as the cleaning and brushing of all interior surfaces of the boiler, removal of ashes and soot from the firebox, thorough cleaning of the smoke pipe and the base of the chimney, and servicing of any automatic firing equipment which may be installed in the heating plant.
