the "inspected and approved" sticker that is added life assurance for you and your family.

At six-month intervals your car becomes a suspect of safety faults that can cause serious accidents.

That is when an official inspection station will check to make certain that your car is in safe running condition.

Checks—to make certain they will stop and hold in an emergency.

Weights—to make certain they are focused correctly and that they cast illumination a certain number of feet.

Steering Wheel—for trueness and freedom from lost motion.

Tires—for safe traction.

Windows—for safety glass to be in good condition.

Wheels—for balance and alignment.

Windshield Wiper—to make certain it works.

Mirror—for clearness of vision.

Horn—that signal can be heard for at least 200 feet.

Exhaust—muffler and all pipes and connections for safety.

Inspecting your car and the car of every other Pennsylvania driver has paid off in lives saved and injuries avoided. This chart tells the story.

While the traffic accident rate due to mechanical failure of cars is 18% in the United States—the rate for such accidents in Pennsylvania is less than 4%.

Pennsylvania cars are 4½ times safer. That's how car inspection benefits you and all of Pennsylvania.

Traffic experts recognize this fact and are urging all states to follow Pennsylvania's lead in this worthwhile safety measure.

Car inspection is for your protection.

YOU WILL NOT BE PERMITTED TO DRIVE YOUR CAR LEGALLY AFTER JANUARY 31ST, IF YOU DO NOT HAVE AN OFFICIAL CAR INSPECTION STICKER.

Babson Sees Drop In Business

(Continued from Page One)

ing 1950 will continue about the same as during 1949.

44. The growth in industrial pensions should help real estate sales in Florida, California, New Mexico and Arizona.

GENERAL BUSINESS

45. Many business concerns find their operations sliding down toward the break-even point. There will not be as much margin between costs and selling prices during 1950 as during 1949. Unemployment will gradually increase due to the installation of labor-saving machinery and other causes.

46. Military preparedness will continue to bolster general business and employment during 1950, but this is not a healthy development.

47. Excluding Government owned commodities, the physical stock piles of manufacturers will remain about the same during 1950 as during 1949.

POLITICS

48. 1950 will be an election year. The Republican Party will remain in the doghouse. The Administration will continue to talk radically against Wall Street and the so-called "Selfish Interests", but at heart the Administration will be fairly conservative. Its bark will be far worse than its bite.

49. The administration will continue to be sympathetic to organized labor unless someone like John L. Lewis goes too far. In that event such a man will be made the whipping boy, but with the consent of other prominent labor leaders.

50. The Congressional Elections of 1950 will not change the political status of Congress to any great extent.
