

Lehman

Mrs. Gordon Dawe,
Phone 362-R-10

Mr. and Mrs. Kenneth Alling, Westminster, Md., and Mr. and Mrs. Ira Alling, Wyoming, visited Mr. and Mrs. Francis Lewis recently.

Mrs. Mabel Coleman, Philadelphia, spent the weekend with her parents, Mr. and Mrs. William Carichner.

Private William Simms, recently stationed at Fort Bliss, Texas, is spending a 21-day leave with his

parents, Mr. and Mrs. A. B. Simms, before being transferred to Fort Lawton, Washington.

Mrs. Nell Falkenstein, Seattle, has just spent several days with Mrs. George Lewis.

Mr. and Mrs. Lawrence Drabick and their two sons are spending their vacation with Mrs. Drabick's mother, Mrs. George Lewis.

Mr. and Mrs. A. B. Simms, and Mr. and Mrs. Gordon Dawe and son Billy, spent Sunday at Stearns Lake visiting Mr. and Mrs. William Crum and daughter. Mr. Crum is a former Lehman English teacher. Vacation Bible School is closed

after a two weeks session at the Methodist Church. With forty-one pupils enrolled, fifteen had a perfect attendance record.

Harvey's Lake

By Mrs. Albert Armitage
Telephone H. L. 4531

Mr. and Mrs. Paul Avery and son Byron of New Jersey are spending a week with Mr. and Mrs. George Armitage.

Mrs. Kate Shultz is spending a week with her aunt in Danville.

Mrs. Herbert Davis Sr. has returned to Chester after spending a week with her mother, Mrs. Harriet Rauch.

Mr. and Mrs. Harold Carr of Kingston spent the weekend with Mr. and Mrs. Albert Armitage.

Private Walter Crispell has completed his training at gunners school at Lowery Field, Denver, Colorado. He has returned to Texas for reassignment.

Mr. and Mrs. Stanley Kopson and son David are moving to Harrisburg at the end of the week.

Beaumont

By Mrs. William A. Austin
Phone H. L. 3424

Due to lack of cooperation from the Weather Man there was no game between Carverton and Beaumont last week.

The influx of holiday visitors include: Donald Jones of Nutley, N. J., who is at the "Casey" Denmons along with the David Mowry Family of Jersey City; the Harold Dennis family is with Mrs. Dennis's parents, the Edward Condons; and Mrs. Rosa Stevens of Wilkes-Barre is with the C. J. Dresses.

Curb your dog! Hilberts Hatchery was the scene of havoc caused by two dogs who certainly had a 'yen' for pullets. Mr. Kehrl of Nicholson has been on the scene checking up.

The Walter Pilgers, Sr., are pleased to have their sons, Walter Jr. and Charles at home. "Walt" is on vacation from Eastman Kodak of Rochester, N. Y., while Charles of the Navy Air Corps is home on leave after his shakedown cruise to Cuba.

Charles Lewis and Charles Hobbs

FARM TOPICS

Grow Cover Crops
For best results, the annual growth of wood on peach trees should be 10 to 14 inches long and of medium diameter. C. S. Bittner, extension fruit specialist of the Pennsylvania State College, recommends use of cover crops to maintain moisture and proper soil conditions, and fertilizer for nutrition.

Protect Vegetables
Spraying vegetables with an aluminum sulphate solution will keep rabbits, woodchucks, and other animals from eating the leaves of garden crops. R. H. Thompson, extension wildlife management specialist of the Pennsylvania State College, says the bitter taste repels the animals but is not harmful.

Promote Farm Safety
Falls are the leading type of farm work accidents, according to extension agricultural engineers of the Pennsylvania State College. They suggest keeping walkways and steps in good repair, unobstructed, and well lighted. Also, keep ladders in good condition and easily accessible in case of emergency.

Control Mosquitoes
Elimination of possible breeding places is the most effective way to control mosquitoes, reminds J. O. Pepper, Penn State extension entomologist. These insects breed wherever stagnant water collects

of the "Canadian Campers" caught several two pound "wall eyes" while the honors went to William Arch Austin who brought home the "big one". On July 1 while fishing for bass the entire group boasted of their limits keeping only those over fourteen inches. The high light of the trip was a ball game with Parham who were last year's soft ball champs of Ontario. What did the boys from the States do? They lost to Parham in soft ball, but had sweet revenge in hard ball at the hands of Bert Cross pitching the Staters to a 15-0 win.

Sincere wishes for a complete recovery are being sent to Charles Hobbs, Sr., who is seriously ill at the General Hospital.

Have you decided whether or not you want a "Fresh Air Kid"? The deadline is July 10, however the "Kids" arrive via Lehigh Valley Railroad on July 21 for their two weeks,

—ponds, tin cans, bottles, and rain barrels.

Irrigate Pastures
If you have plenty of water available, it may pay to irrigate pastures, says C. H. Bingham, Penn State agriculture engineer. Experiments show a return of \$61.30 an acre above costs for each pasture season.

Visit Penn State
For convenience, July 10 and 11 have been set aside as Visiting Days at the Schools of Agriculture and Home Economics at the Pennsylvania State College. Mark these dates.

Protect Egg Quality
To protect the quality of eggs, store them in a cellar with a temperature of 50 to 60 degrees Fahrenheit and a humidity of 75 per cent, recommends F. H. Leuschner, extension poultry specialist of the Pennsylvania State College. Gather the eggs three times a day, and cool and pack them daily.

Control Aphids
Spraying with nicotine sulphate is suggested by Stanley Gesell, Penn State extension entomologist, for control of aphids on vegetable crops. It is also possible to use rotenone or pyrethrum extracts. For dusting, use a 1 per cent rotenone dust, a 4 per cent nicotine dust, or a ready mixed rotenone-pyrethrum dust.

Cultivate Gardens
Keep the surface of the garden soil in a loose, fine condition by frequent cultivation, urges J. O. Dutt, extension vegetable specialist of the Pennsylvania State College. Avoid deep cultivation, especially near the plants. Shallow cultivation is just as effective for killing weeds.

More Laying Hens
It looks like we shall have more laying hens to provide market eggs next fall. Penn State extension agricultural economists report that there has been a heavy demand for pullet chicks for flock replacements this spring.

Protect Tomatoes
Spray or dust your tomato plants to protect them from blight, urges A. H. Bauer, Penn State extension plant pathologist. Use a fixed copper spray or dust, or bordeaux mixture. Four weeks after transplanting is a good time to start protection.

Use Running Water
An automatic water system on the farm is not only a convenience but also a labor-saver, reminds N. H. Wooding, extension agriculture engineer of the Pennsylvania State College.

School Of Agriculture

Visit Days July 10, 11

July's visiting days at the School of Agriculture of the Pennsylvania State College will be Tuesday and Wednesday, July 10 and 11. A. L. Beam, chairman of the School's public relations committee said field crops and field machinery will be stressed, although visitors will be guided to all parts of the College farms, experimental plots and buildings of the School.

In the previous monthly visiting days, numerous organized groups from many counties, including extension groups, FFA chapters, and school units, chartered special buses to inspect those features of particular interest. As in the previous schedules, the School of Home Economics is co-operating in the visiting days by making available those features of special interest to homemakers.

Groups wishing to inspect any of the thirty-odd points of interest arranged by the School of Agriculture can make specific arrangements by writing Prof. Beam at the College. Guides will be provided to explain experimental work or other projects indicated by the group.

Dairy animals and other livestock continue to stir considerable interest among visitors, but recently more inquiries have been concerned with the test flower gardens now reaching a riot of color with 835 different annuals under test, in addition to nearly 300 different roses. All facilities of the School of Agriculture are available to visitors on both dates, Prof. Beam announces.

Guests At Air Base

Sampson Air Force Base, N. Y. Mr. and Mrs. Albert Sonder, RFD 2, spent last weekend with their son Harold O., who is now taking Air Force indoctrination training here.

Beekeeping Course Registration

Registrations are now being accepted for the short course on Beekeeping at the Pennsylvania State College, August 20 to 24. Most of the instruction is of a practical nature, and will include a review of recent research findings. Details can be obtained from any County Agriculture Agent or by writing A. L. Beam, director of short courses, at State College.

some good news about cancer

APPROXIMATELY one in four of the 158,000 lives lost each year in the United States from cancer could be saved if the knowledge already in existence could be made available to all—assuming that the knowledge is acted upon promptly. Here are the danger signals:

1. Any lump or thickening, especially of the breast.
2. Irregular bleeding or discharge from any of the body openings.
3. Any sore that does not heal.
4. Persistent indigestion.
5. Sudden changes in the form or growth of a mole or wart.
6. Hoarseness persisting for two or three weeks.
7. Regional pain.

Only in the early stages can cancer be successfully arrested. At the appearance of suspicious symptoms see your doctor at once. For prompt, expert prescription service, call on us.
