*what is a pharmacist?*

THE FUNCTION of the pharmacist is distinct and set apart from that of the physician. As pharmacists, we are trained and skilled in the art of compounding and dispensing medicine. We are not qualified to diagnose your ills nor to prescribe the proper medication. Waste and suffering commonly result from experimenting with various forms of self-medication. Go to your physician first. After a careful examination he will tell you whether or not medicine will help. If he gives you a prescription, bring it to us for expert compounding. You will find our facilities and service adequate to every need.
