OLIVER Cletrac CRAWLERS...

Front-mounted No. 895 QD Cultivator on Model "HG" 68.
Rear, semi-mounted No. 22-A Mower on Model "HG" 42.

designed for diversified farm work

Here's a crawler tractor—the Oliver "Cletrac" Model "HG"—built specifically for diversified farming, and in four center-to-center track widths: 68, 60, 42 and 31 inches to suit your cropping practices.

What's more, Oliver builds a variety of mounted tools to fit the wide tread models. When you buy some mounted tool—the No. 895 QD (Quick-Detachable) Cultivator, for instance—basic parts such as support pipes, levers and rocker shafts become component parts of several other attachments.

For full information on the broad line of front-mounted and pull-behind farm implements for Model "HG" tractors, see-us. And, once you see how an Oliver "Cletrac" can pull, and find out how easily it handles, we believe you'll want one for your farm.
