Fin, Fur, and Feather
(Continued from Page Two)

RESOLVED, That the PFSC support House Bill No. 1246 which permits resident landowners to fish in registered farm ponds (nominal cost) at any time of the year, regardless of season limit and sizes.

CLEAN STREAMS
RESOLVED, That the Sanitary Water Board and the Department of Forests and Waters take immediate action to relieve the citizens of communities of Penn., Jeanette and Manor of the filthy and unhealthy conditions of Brush Creek which flows through these towns, and further, BE IT RESOLVED, that since these departments have had their engineers survey the damage done by the re-

cent overflowing of the filthy water into the homes and over the property that no time be lost in correction of this condition.

RESOLVED, That Pennsylvania Federation of Sportsmen's Clubs urge the Governor John S. Fine, and the Senate and House of Representatives of Pennsylvania to defeat House Bill No. 1495, which would delay and thereby be a step in the direction of defeat of Pennsylvania clean streams program; AND FURTHER RESOLVED, That this Federation urge the Governor and Pennsylvania's said legislative bodies to fight any and all such similar bills; AND FURTHER RESOLVED, That this Federation still further urge the Governor of this Commonwealth and our State legislative bodies to vigorously push the clean streams program of Pennsylvania.

RESOLVED, That the State Federation contact Governor Fine and vigorously protest any let down in the Clean Streams Program, and request that the program be continued as originally inaugurated with no abatement.

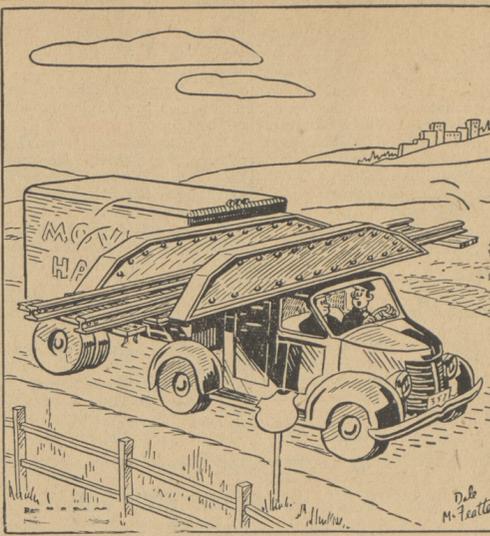

WHEREAS, There is evidence from the experience of interested citizens throughout the Commonwealth that the Sanitary Water Board is not adequately enforcing the existing pure streams law and is not taking adequate steps to enforce the permit law for mining or elimination of industrial and/or municipal pollution.

WHEREAS, There is evidence from the experience of interested citizens throughout the Commonwealth that the Sanitary Water Board is not adequately enforcing the existing pure streams law and is not taking adequate steps to enforce the permit law for mining or elimination of industrial and/or municipal pollution.

RESOLVED, That the legislative committee of this Federation seek a concurring resolution from the State Legislature referring the question of the adequacy of the enforcement of the Acts of Legislature concerning pure streams, mining permits and industrial and municipal pollution to the Joint State Government Commission for Investigation and Recommendation to the next session of Legislature.

DOGS
BE IT RESOLVED, That there be more strict enforcement of the dog

STRICTLY BUSINESS by McFeatters

"I was afraid we weren't going to get under that last bridge!"

law by dog law enforcement officers.

GENERAL

WHEREAS, There are frequent accidents in Pennsylvania waters resulting in loss of lives and property, many of which are caused by, or directly traceable to, faults, boats or equipment furnished by boat liveryes; and WHEREAS, many such boat liveryes take absolutely no safety precautions, and furnish no safety equipment, and WHEREAS, many boats rented by liveryes are unsafe to use, and WHEREAS, in some accident cases if a motor boat had been available at the dock for rescue work, lives would have been saved, THEREFORE, BE IT RESOLVED, that the PFSC petition the Pennsylvania Fish Commission to take appropriate action to have all boats and equipment for rental purposes subjected to periodical inspection, and that minimum safety requirements be set up, such requirements to include a motor boat available for emergency use at all liveryes having a minimum number of boats for hire, said number of boats to be set by the State Fish Commission.

WHEREAS, There is a lack of uniformity in the constitution and by-laws of various divisions and local clubs; and WHEREAS we have many unchartered clubs in our Federation; THEREFORE BE IT RESOLVED, That the South Central Division request the Pennsylvania Federation of Sportsmen's Clubs to appoint a committee to study the constitution and by-laws and work towards a unification of all divisions, county units, and local clubs to conform to the present State Constitution and By-Laws, with the view that the future clubs and unchartered clubs may be chartered through the Pennsylvania Federation of Sportsmen's Clubs.

RESOLVED, That Pennsylvania Federation of Sportsmen's Clubs

heartily endorse the State's Susquehanna Flood Control Systems.

WHEREAS, The General Assembly of 1949 authorized the State Department of Agriculture to make a reconnaissance survey of such tree crops as chestnuts, walnuts, hickories, acorns and beechnuts to determine their present and potential value as food for humans and as wildlife feed and, WHEREAS, This survey has been of great assistance in getting blight resistant chestnuts well established and in calling attention to the importance of the English walnut and the persimmon for home planting and of the Asiatic crabapples, the honey locust and filbert for game planting, THEREFORE BE IT REASONED, That the State Federation of Sportsmen's clubs endorse House Bill No. 185 (now in the Senate Appropriations Committee) which provides for the continuation of this State Department of Agriculture.

WHEREAS, The Bureau of Plant Industry of the State Department of Agriculture is greatly handicapped in the control of the present serious outbreak of Oak Wilt in Pennsylvania by the fact that the method is unknown by which the disease is able to spread long dis-

tances and WHEREAS, The responsibility for the research necessary to determine the facts essential to the proper control of this disease rests in the State Agricultural Experiment Station at State College.

THEREFORE BE IT RESOLVED, That the State Federation of Sportsmen's Clubs endorse House Bill No. 186 (now in the State Agricultural Committee) which grants to the Agricultural Experiment Station the necessary funds to undertake a study of Oak Wilt and also to establish a research program for the production of blight resistant chestnuts, walnuts, hickories and other tree crops for human consumption and wildlife feed.

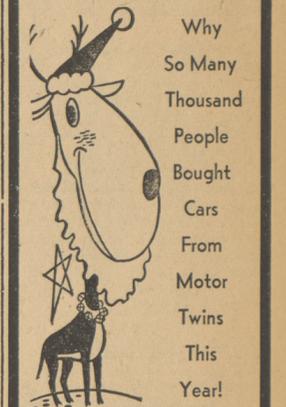

Perhaps many will disagree with some of the above. They are, or have been transcribed by man, and man is not infallible. However there is some consolation in knowing that representatives of 1068 Clubs in sixty-five Counties with a membership of 203,902 are on the alert to protect the interests of all sportsmen in our State, whether they are members of a club or not.

munity, as a whole? To give you, the individual consumer, some relief in water facilities, so many others have given of themselves, also countless hours of hard work and personal expenditures to make this a success. All that is asked of you is to come to the meetings and bring your neighbors and friends and show the rest of Luzerne County how the Dallas half live and take care of their interests. Dec. 3, 1951

ONE-MAN POWER SAW for the FARM

CORDWOOD • POSTS • TREE MAINTENANCE
PULP and SAWMILL TIMBER • CONSTRUCTION

Here's the saw that's designed to lessen work and raise income on the farm. You can take it anywhere—up hill and across swampy land if necessary—because it weighs less than 25 pounds. And cut anything—heavy timber, limbs, hardwood, softwood, frozen wood—because it has a full 3 horsepower.

Many other features too make the McCulloch 3-25 tops on any farm: automatic clutch, built-in chain oiler, recoil starter, and full-power operation at any angle.
