Lions Erect Noxen Street Signs

Bowmans Creek Lions have completed a project of street signs for Noxen. Lewis May, working from the rear of the Noxen Fire Truck, is nailing up the thirtieth sign, with Elvin Bean in a supporting cast.  
Ray Evelan, superintendent of Armour Leather Company, is president. The association has thirty members, the majority from Noxen, with a few, including Robert Belles, principal of Lake School, from Beaumont.

**Harveys Lake Gets 11,600 Trout, All Ready For Anglers On April 15**

Thousands and thousands of rainbow and brook trout were introduced into Harveys Lake on Monday afternoon and again yesterday, with eager anglers forming a parade behind the five tank trucks and watching the fish strike the icy waters of the lake and disappear.  
Frank Jackson reports that the temperature of the lake, with its masses of ice at protected areas, was exactly 32 degrees on Monday, and that temperatures of the tank trucks containing the fish was regulated in accordance, so that no shock should result.  
Great numbers of the 11,600 trout were 15-16 inches long on arrival, with two weeks to gain length and poundage before April 15. All were of legal size.  
Tanks carried on the trucks were aerated all the way from the fish hatcheries with steady jets of water that kept the water in motion and the fish supplied with oxygen.  
Fish were dipped out with nets, placed in tubs, and carried swiftly to the lake.  
Plantings were made at all docks where there was sufficient depth of water and where the water was clear of ice.  
The trucks were late in starting from Alderson nearly two hours after the announced starting time of 1 P.M. on Monday.  
Fishermen crowded around the trucks and were given information as to correct planting of fish.  
In Seneca Lake, Frank says, where stocking was carried out several years ago, it is not at all uncommon to catch a trout weighing five pounds and thirty inches in length.  
This is the first time for many years that trout have been stocked at Harveys Lake, but in 1914, 50,000 fingerlings were introduced, and it was Frank who had charge of the project.  
Trout in those days were received from the Pennsylvania State Fish Hatcheries in tanks like milk cans, transported by train to the Picnic Grounds.

**Will Give Recital  
Louise Kann, Pianist**  
Louise Kann, daughter of Mr. and Mrs. Henry Kann, Trucksville, and Donald Hooper, son of Mr. and Mrs. Will Hooper of Plains, will give a "Concerto Recital" Friday, April 4 at 8 p.m. in the Admiral Stark Room of the Hotel Sterling. Both are pupils of Louie W. Ayre.  
Louise won a recent "Superior Rating" at the District Contest of the Forensic Contest in Bloomsburg.  
Besides playing the first movement of Grieg A Minor Concerto and the Bach D Minor Concerto each will play a group of solos.  
The recital is open to the public with no admission charge.

**Harvey's Lake**

**Warning  
FISHING-POX**  
Very Contagious to males.  
Symptoms: Continual complaints of need for fresh air, sunshine and recreation. Patient has a blank expression, and is sometimes deaf to wife and kids. No taste for work of any kind. Frequent checking of tackle catalogue. Lingers longer than usual in sport goods stores. Secret night phone calls to fishing friends. Mumbles to self. Lies to everyone.  
Prognosis: No known cure, but disease is not fatal.  
Treatment: Medication is useless. Victim should go fishing as often as possible.  
P.S. Be sure to have your license.

**PLANNING ON TV? THEN HEAR THIS!**  
**There Are Only Two Experienced TV Service Stations In The Back Mt.**  
Folks, we have had too many unfortunate TV set owners come to us for help with models they have bought elsewhere which just don't work right. We want to help you so we feel this message is worth repeating. In our 4 years of television sales and service we have sold or serviced over 5,000 sets. Consequently we have come to basic conclusions which we have learned by experience are true. First of all it is important that you . . .  
**BUY TV FROM A TV MAN!**  
If you buy your set from a store which has no service facilities or connections you are immediately only the owner of a set with no help for needed adjustments or help with your location problems. We know of many persons who have, in this case, put their valuable set in the hands of would-be "TV experts." Watch out for these men. They take your set out, give it to a reliable serviceman for a minor repair and return it to you and charge an exorbitant fee.  
**To Answer Your Questions**  
Q. Is Binghamton station WNBC-TV going to increase its power?  
A. Latest request to FCC for an increase has been temporarily denied.  
Q. What is UHF?  
A. UHF is Ultra High Frequency, or a transmitting wave length much higher than the present channels.  
Q. If I buy a new set will it receive UHF?  
A. Yes! All sets sold by us in the past 4 years are adaptable with slight modification.  
Q. What major improvements can we expect in a set if we wait a year or two to buy?  
A. Because of the defense program no radical changes are expected for at least 5 years. At that time color, in TV developed areas, will be made available. (We are not a TV developed area).
