Dallas Hardware Has Its Annual Display Of Mounted Specimens

Bill Compton's nine-point buck, shot last year after trailing it for three days, is the centerpiece for Dallas Hardware's hunting display. The largest buck shot in the area, and one of the most notable killed in the State, its antlers measure twenty-five and one half inches across and twenty-six inches around the curve of the main beam. Circumference at the base is six and one fourth inches.

The black bear rug beneath the deer head was loaned by L. C. Sutton. Ray Shiber contributed a deer head, Carl Husband some ducks

of a breed now almost extinct. The albino deerskin on the wall belongs to Ralph Welsh, and the long rifles, antique and valuable, are the property of Fred Clemow.

The wild life is posed against a background of autumn leaves, a foundation for ammunition, guns, hunting knives and miscellaneous equipment for hunters. The display has attracted a great deal of nostalgic attention from hunters who were not permitted to enter the woods during the first ten days of the hunting season because of dangerously dry conditions.

Safety Valve

The enclosed poem which I ran across in my reading gave me so much comfort that I would like to share it with my friends through the Post.

Mrs. Laverne Race
Dear God,
When little things would irk me
And I grow impatient with my loved ones

Help me to know
How in a moment joy can take its flight
And happiness be quenched in darkest night
Keep this thought with me through the live long day
That I may guard the harsh words I might say
When I would grumble and grow fiery hot
At trifles that tomorrow are forgot
Let me remember, Lord, how it would be
If these, my loved ones, were not here with me.
