Save more than half your seed

With the Brillion Sure-Stand you cut conventional grass seeding rates by more than 1/2. If you drill or broadcast this means you save enough seed to pay for a Brillion Sure-Stand every second day of seeding. This is true under all growing conditions — in wet or dry years... in loose or lumpy soil... with light, chaffy, or smooth seeds.

Here's why! The Sure-Stand sows all seed within the top 1/2 inch of soil... uniformly, accurately... in a firm, well-worked seedbed where moisture comes up from below and the seed is close to plant nutrients.

Sown this way every seed has a chance to grow. You get a positive catch, a sure stand. Tests show more seed germinates... crops are healthier.

See us for complete information — bring the Sure-Stand savings to your farm.
