HUSTON'S FEED SERVICE, Fernbrook

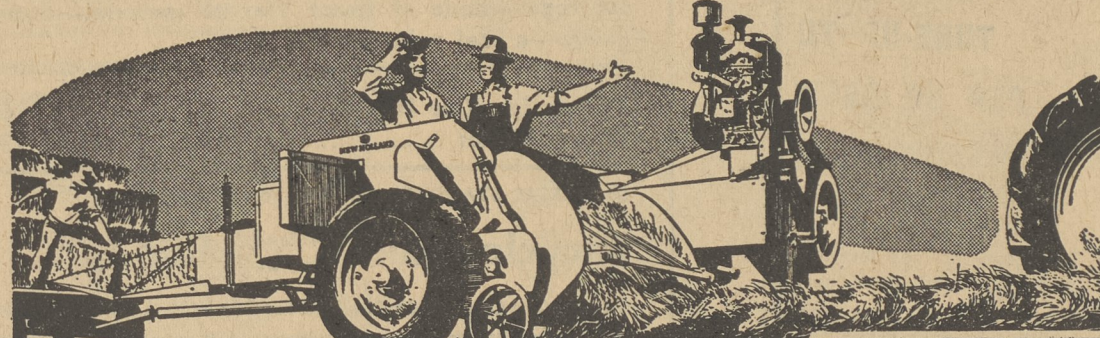

THESE TIPS WILL SAVE YOU FEED!
Here are a few tips which will help you poultrymen stretch your feed dollars just a little farther. Avoid waste and follow these directions:
1. Never fill feeders much more than half full.
2. Feed at least 3 times a day.
3. Use plenty of feeders (15 large 5 ft. feeders per 1,000 birds).
4. Use a scoop to fill feeders.
5. Keep rats under control at all times.
6. Have all feeders equipped with reels.
7. Let birds clean up at least once a day.
8. Don't dump feed out just because litter is mixed in. make them clean up the feed and feed more often.
9. Place a paper or cardboard under feeders so birds will get the feed they bill out.
10. Raise the feeders up on regular feeder blocks, 2x4 pieces of lumber or bricks, when the birds get around 7 weeks of age.

F.F.A. STATE FINALS
GEORGE YURKO, Lehman dairyman, stopped in this week with the news that his son, George Jr. was among those chosen from the Future Farmers of America Chapter at Lehman-Jackson-Ross Joint School to represent the school at the F.F.A. State Finals at Penn State University.
F.F.A. members from all over Pennsylvania met this Tuesday at the University to select State winners in F.F.A. competitions and to conduct their annual business meeting.
Attending from the Lehman Joint School were: Mr. Lawrence Drabick, "Ag" instructor; Bob Norris, F.F.A. delegate; Lester Lynn, poultry judging; Kenneth Kidd and Jack Kern, farm mechanics, and George Yurko Jr., dairy judging.
Unfortunately, at the time this article went to press, we didn't have the names of the boys from other Back Mountain Schools who attended the finals. However, we're sure that our area was well represented and that the boys put up a "whale of a battle!"

The most compact baler ever built!

NEW HOLLAND'S sensational MODEL "66"
Makes hay baling practical on almost any farm
It's self-powered...makes square, man-size bales
Costs hundreds of dollars less!

The surprise of a lifetime! That's the New Holland Twine-Tie "66"! We'll wager you've never seen a baler so compact in design . . . so completely new!

You'll be amazed the first time you see the "66". It's shorter and lower than most balers. It's designed to operate with a one or two-plow tractor. It's priced so low that even small-acreage farmers can now afford the finest in baling equipment.

Now you can enjoy the benefits of having your own baler on the farm. You can bale your hay the moment it's ready to come in, and bale it fast for minimum spoilage by sun or rain.

New pre-compression baling action given the "66" unusual capacity. It can kick out 6 square bales a minute . . . package up to 7 tons of hay an hour! And it bales anything—clover, prairie hay, sudan grass, maize.

The low center of gravity and wide tread of the "66" give greater stability even when baling on hillsides. The wide 47 1/2" pick-up takes any windrow.

Engine is mounted high in the air, clear of dust, and chaff.

Roll-away bale chute flips bales out of the tractor's path. Twine box is easy to get at—holds four, full-size balls of twine.

HEALTH HINT
Feed Birds But Don't Feed Worms
I don't blame folks for balking at catching pullets on range to give them a worm capsule. In worming with Chek-R-Ton Granules you don't have all that fuss. Yet, Chek-R-Ton gets the worms without upsetting the birds.
When birds are 10-12 weeks old, simply substitute Chek-R-Ton Granules for their regular feed for a period of 2 days: Repeat this treatment just before moving birds to the laying house: This way you leave the worms (and lots of potential trouble) out on range.

WATCH FOR SNEEZES
This week has brought an increase in the outbreak of colds in many local poultry houses. If you notice sneezes, act at once. Ask us to take a look and we'll recommend a treatment.

WE ARE READY, willing and able to give you fast, dependable, friendly service. Let us supply your feed and farm supply needs. Come in and get acquainted!
