Edward Burnaford and Kenneth Kocher have joined the Navy.

Paint Job Started On Kindergarten Building

Work started this week on exterior painting of the kindergarten building in Dallas Borough. Carl Steele, Kingston, was low bidder for the two-coat job, including painting of metal work and porch floors and ceilings. The building has been yellow, and will now be a gleaming white.

The two-story structure will house three kindergarten rooms, two on the first floor and a third and larger one on the second. The fourth room is reserved for storage.

Children who will be five years old on or before January 31, 1956, are eligible for kindergarten. Children outside the Dallas Borough-Kingston Township jointure may enroll on a tuition basis of \$10 per month. All registrants must have birth and vaccination certificates.

THE ENEMY—The "who, me?" gesture seemingly made by this grasshopper convinces no one in Missouri. All-out war on the insects has been declared by the Missouri Farmers' Association, which has mobilized spray planes for the battle. Six to seven hoppers per square yard eat off pasture at the same rate as a cow, according to farm experts.

College One Of Oldest In U.S.

Business College Founded In 1883

A survey completed last year by Ray Baxandall of the Deen Geer Advertising Company of Oshkosh, Wisconsin, reveals that Wilkes-Barre Business College is one of the oldest private business schools in the country. Wilkes-Barre Business College, founded in 1883, has been in continuous existence for seventy-two years in the city of Wilkes-Barre. Hundreds of its graduates are a part of the business and civic life of the community.

The oldest private business school in the United States is the Duffs' Iron City College of Pittsburgh, founded in 1824. The institution is 130 years old. The Soule College of New Orleans has been training for business for 99 years.

Among the other old private business schools in the United States are: the Gard Business University of St. Joseph, Mo., 75 years; Wichita Business College in Kansas, 70 years; Massey Business College of

Houston, 67 years; Rutherford-Metropolitan School of Business of Dallas, 67 years; Draughon School of Business of Little Rock, 64 years; Brown-Mackie School of Salina, Kansas, 62 years; Enid Business College of Enid, Oklahoma, 60 years; Brantley-Draughon College of Fort Worth, 58 years; Draughon's of San Antonio, 56 years; Tulsa Business College, 54 years; Draughon's Business College of Oklahoma City, 52 years.

Wear Protective Clothes

Proper clothing is essential to prevent colds and other illnesses during fall and winter months. The Institute For Safer Living urges parents to make certain their children are protectively dressed when they start off to school. Wet feet make it more likely to contract a cold. Should a cold develop, keep the infected youngster out of school and away from others in the family.

WYOMING SEMINARY SCHOOL OF MUSIC

Announces
The Opening of its Fall Semesters
September 7, 1955

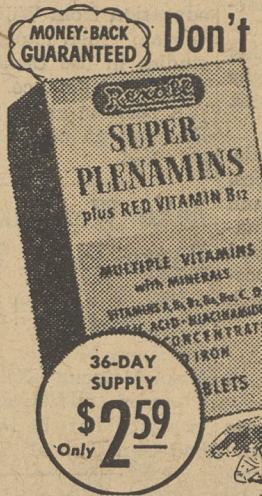

COURSES
ORGAN
PIANO
VIOLIN
VOICE

Proper Light Not Expensive

Good Light Makes For Better Sight

Children should learn at an early age that, although objects cannot be changed, seeing is affected by the quality and quantity of illumination, over which they do have control. They should be given enough practical knowledge about good lighting to be able to get it when they need it and learn to realize that good light will make their work less tiring. It is to their advantage, also, to know about behavior of light, electricity, and the eyes, as applied to the recommended practices.

In the early years of life, it is necessary that the child develops healthful habits of reading, writing and other close visual tasks. They should be encouraged to sit and stand erect and easy. Good seeing will make good posture easier to maintain. Work should be held at the proper distance and correct angle from the eyes and in the range of plenty of well diffused, well distributed illumination. The eyes should not be unnecessarily exposed directly to the sun or brilliant unshaded electric lamps.

One of the most important phases of our welfare is "easy seeing". True, we may enjoy good general health in spite of defective sight, but this is a handicap so serious that it should be prevented or corrected wherever possible.

Everyone should not only know the importance of good lighting for visual tasks, but also how to achieve it. Everyone should acquire the habit of arranging good lighting for close work. Furthermore, if you know how and plan a well lighted home, you will add to the health and safety of other members of the family. If you appreciate good home lighting, you will advocate good community lighting on the streets, in schools and other public buildings.

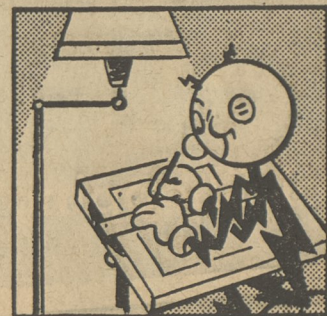

Eyesight is priceless—good light is cheap.

Avoid Horseplay On School Busses

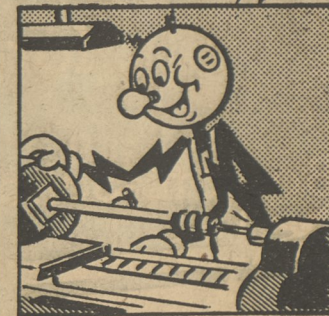

Horseplay on the school bus means distraction to the driver and possible injury to the children. Parents should instill in their child's mind consideration for schoolmates. Tripping, playing tag, pushing or rushing while waiting for, or while inside the bus, could mean serious injury. Neighborhood mothers should take turns supervising school children at the bus stop and insure safe boarding of the bus.

A word from the *Eyes* is sufficient!

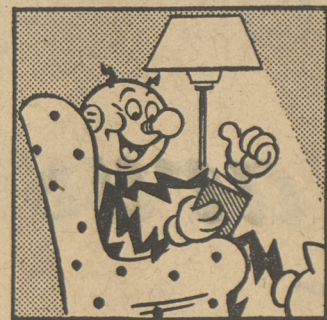

Reddy Says:
LOOK TO YOUR LIGHTING

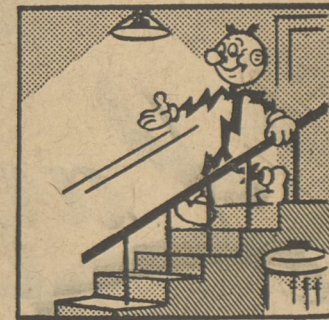

for STUDY

for WORK

for READING

for SAFETY

BETTER LIGHT . . . BETTER SIGHT

Reading . . . working . . . studying . . . all these need the right light to help your eyes see right . . . and there's a right-size bulb for every job. Check your home today! Replace dark bulbs . . . fill those empty sockets . . . and while you're about it, light up those dark stair and hallways for safety.

Remember . . . eyes are priceless — good light is cheap.
