Keeps Oxygen Tanks Filled For Lake Use

Chief Edgar Hughes says that it is Dean Shaver, Harveys Lake well-driller, who keeps the oxygen tanks filled for ambulance and fire truck, as his contribution to the community. There are two small tanks on the ambulance, each capable of furnishing oxygen for the resuscitator for one hour, and interchangeable. The large reserve tank can be left at headquarters, or in case of emergency taken direct to the scene of an accident.

forget something?

Maybe it's the monthly water check for your car's battery? Of course! And a battery without water is as good as no battery at all. But wait! There's no need to worry... not if that battery is a Cities Service Tri-Fill battery. The Tri-Fill actually needs water just three times a year in normal car use. Of course, a monthly water check is best... but if you forget, the Tri-Fill won't let you down... won't run dry on water. Unlike ordinary batteries, it contains a great water reserve that allows for human error. If your present battery is getting weak, stop in this week for the remarkable Tri-Fill and enjoy years of sure-starting performance.
