## HALL'S PHARMACY Monthly News

THE PRACTICE OF MEDICINE has changed greatly since the days when Doctors visited their patients in a horse and buggy. Physicians then used to carry a few drugs in their bag which they would give, even though the same medicines seemed to be used for almost every ailment.

IT DIDN'T MAKE TOO MUCH DIFFERENCE because there were very few drugs known then that could accomplish a positive result. The most important things a physician could do were to diagnose the condition, offer some medicine to ease distress, and give his valuable advice on how to take care of one's self while very slowly waiting to get better.

BUT NOW WE HAVE THOUSANDS of new medicines, unknown then, that can be depended upon to not only give relief, but often, almost a miraculous overnight cure. Slowly, but surely, we are perfecting specific drugs that will treat specific diseases. It would take a physician's bag, the size of a prescription department to hold all we now have.

ONE OF THESE MEDICINES, your physician knows which, will help you most if sickness invades your home. In our prescription department are these thousands of different medicines. Your modern physician knows he is no longer limited by the few drugs he can carry in his bag or office.
