PILLAR TO POST

(Continued from Page 2)

We were not bludgeoned with the facts of life.

Times changed, the little girl who viewed the new baby grew up and had a baby of her own. Modern psychology instructed that he must never be turned aside with a soft answer. He should know the TRUTH.

So when a new baby was imminent, he got the truth, in large and unvarnished chunks.

He was bewildered, but interested. I took him into the grocery store, and he broadcasted his information. It wasn't really necessary for him to do so as the condition was fairly obvious.

He would have been much better off if he had not been burdened with the facts of life at the tender age of four.

Children have enough troubles of their own without inflicting adult problems upon them until they are ready for them.
