That good things come in small packages is particularly true of medicines. It is amazing how often a serious illness is relieved, almost like magic, within a few hours.

When the new hormones and antibiotics were first released many people were dismayed that some of them cost as much as 50c each. They soon learned that not only were they saving more lives, but people got well so much quicker that medicines-per-illness now cost less than before.

We, of course, price all prescriptions as low as operational costs permit.
