

Here Is A Brief History Of Northmoreland Baptist Church

March 14, 1850, a council convened at what is known as the Durland School House in Northmoreland Township, Wyoming County, and publicly recognized thirty-two brethren and sisters as an independent Baptist Church.

Within one year the membership had grown to 51 persons. During the year 1851 construction of the present church building was started at Center Moreland. These were lean years and it was only with great personal sacrifice by its membership that the present House of Worship was completed in the fall of 1856.

The formal dedication service of the Northmoreland Baptist Church took place on January 1, 1857. Elders C. A. Fox, Benjamin Miller and George W. Scofield participated in the ceremonies, with Elder Fox preaching the opening sermon. Within two years the membership had grown to 98 persons.

A period of eleven dark years followed in which the troubles of a divided nation took its toll. Church history records it as "a time of Spiritual drought and barrenness during which the growth of Christ's followers was dwarfed."

An upsurge of spiritual interest

and growth was noted in the winter of 1870. A second House of Worship was constructed at Vernon in 1873 and the Dedication Service was held December 18 of the same year with Elder Lowry preaching the opening sermon. During 1875 the membership had grown to 148.

Throughout the years the Mother Church and the Mission Church at Vernon have cooperated to promote the cause of Christ in the respective communities. In 1951 the Community Baptist Church of Vernon was organized and the Church property at Vernon deeded to the newly created organization without charge by the Mother Church.

On July 9, 1890, the Northmoreland Baptist Church was chartered by the State of Pennsylvania in accordance with the requirement of an Act of the General Assembly of

the Commonwealth of Pennsylvania approved April 29, 1874. The original charter application bears the names of the following:

John W. Gay, Frank Gay, S. W. VanSooy, Joseph Winters, Miles Eggleston.

Former pastors who are still living, are:

Rev. E. A. Benson, now pastor of Community Church, Vernon; Rev. L. B. Jones, Allentown; Rev. J. W. Bronson, pastor Baptist Church, Chester; Rev. Lester Rasmussen, whereabouts unknown; Rev. M. F. Rasmussen, California; Rev. John C. TenHoeve, Tucson, Arizona; Rev. Kenneth Elgena, pastor Park Avenue Baptist Church, Johnson City, N. Y.; Rev. Carl Brandon, pastor Baptist Church, Jermy; Rev. Truman Reeves, present pastor, called to pastorate April 15, 1951.

Buy Honey By Its Flavor

Did you know—every flower produces honey with a distinctive flavor, color and odor. This means there's a flavor available for almost everyone.

E. V. Chadwick, county agent, says in general, the light colored honeys are mild flavored, while the darker honeys have a richer, fuller flavor and color.

Light colored honey is generally sold as clover, but there are many other sources such as locust, sumac, basswood, goldenrod, and aster. Dark honeys produced in Pennsylvania are tulip poplar, buckwheat, blackberry, and many other wild flowers.

You can put honey to no end of

use, such as topping for ice cream, sweetening for fresh fruit, cereal and beverages. Honey helps keep baked food moist, makes a wonderful spread for bread and toast and just can't be beat as a sirup on hot cakes and biscuits.

Honey is available in many forms. The largest amount is sold as liquid or extracted honey with comb or honey a poor second. Cut comb or chunk honey is finding its way into customers' hands in limited

amounts. Possibly the most delightful way to buy honey is in the creamed or honey spread variety. Here's to honey—it's plentiful and cheap.

Asian Flu and Common Sense

WHY THOUGHTFUL AMERICANS WILL WANT TO TAKE ADVANTAGE OF THE NEW VACCINE

To the average individual, Asian Flu itself is not a particularly alarming disease. Except for some bodily discomfort and perhaps a week's disability, most people have little to worry about from the disease itself.

BUT...Asian Flu does constitute a threat!

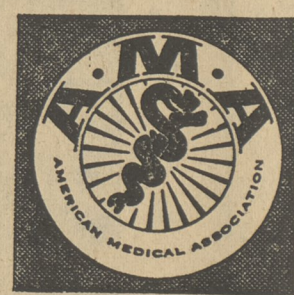

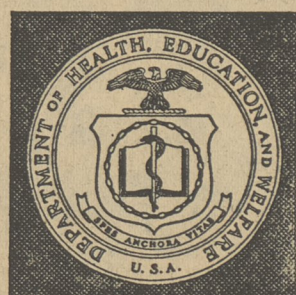

1. It can lower the body's resistance to more severe diseases. Serious complications such as pneumonia may occur.
2. Asian Flu is highly contagious. Many people can come down with it simultaneously.
3. Thus, should an epidemic strike, schools, businesses and essential community services may be seriously affected.
4. Medical facilities in epidemic areas could become gravely over-taxed.

FORTUNATELY...an effective vaccine has been developed!

This new vaccine is safe for both adults and children. The American Medical Association and the U.S. Public Health Service recommend its use for everyone, except persons allergic to eggs. It provides immunization to most people within 10 to 14 days after vaccination and should offer protection for approximately a year. Your doctor can administer it.

Obviously, for the protection of your family and friends, you should be vaccinated against Asian Flu.

Do it at your first opportunity!

This message is published as a Public Service in cooperation with The Advertising Council, The U. S. Public Health Service and The American Medical Association

If You Have Grain

Bring It In—

We'll grind your grain and add the concentrate, salt, mineral and molasses to make a dairy feed to your specifications.
