**Successful Investing**  
(Continued on Page 5)

see quicker recovery in Phillips Petroleum and I suggest that you switch Indiana into the latter issue. DuPont requires little comment. A recent Supreme Court decision requires the company to give up ultimately its control of General Motors and no one yet can determine how this will affect DuPont stockholders. I personally would switch this holding into American Cyanamid which seems to have better rebound prospects.

**Public Utility Stock Should Be Held**  
Puget Sound Power and Light is a good hydroelectric utility operating in the state of Washington. The stock should be held for yield and market improvement on lower money rates. Your Cleve stock now shows you a loss partly because it was bid up too high earlier this year on popular interest in electronics. Hold this for an expected comeback on added defense spending. Ohio Oil is a blue chip producer with good growth prospects, and I would be patient with this situation. The other stocks you mention are satisfactory in their respective groups, and should recover.
