"IT IS A MISERABLE THING TO LIVE IN SUSPENSE"

(Author's Name Below)

Physicians and pharmacists often wonder whether many current health articles are not causing some mental distress. Their information about new miracle drugs, usually accompanied by vivid descriptions of disease symptoms, often may influence one to think they have the disease they are reading about.

If you have any constantly re-occurring unusual symptoms that you think might be serious, don't worry about it. Just visit your physician and let him find out if you really have any problem.
