State Highway Department finally got around to paving the Highway from Chase Corners over the Mountain. While the black topping is spread very thin in some spots, for the most part it is a wonderful improvement. One wonders why they would allow a road to get in such bad condition. A white center line is still needed. During heavy fogs it was almost impossible to travel this road without guide lines.

It is reported that during the black topping brakes on Highway Department's roller failed and the operator had a wildride down the steep grade. He stayed with the roller and finally managed to stop before any damage or harm was done.

Mr. Gdosky gave an outline of work that the Department of Forests and Waters is completing and listed the percentage of money used for each division of the work. He said that money used for new buildings comes from timber sales and

oilwells located on state property. The study of Club work is a new division of club work for the women of Harveys Lake. They showed their interest in these programs by asking questions and exchanging information.
