

# CONGRATULATIONS

## New, Modern Building of Back Mountain Lumber Co. in Shavertown

Heated and Cooled Electrically by Carrier Electric Heat Pumps  
 . . . the most modern method of Comfort Conditioning in Buildings and Homes

The Back Mountain area is happy to welcome the return of the Back Mountain Lumber Co. to the life of the community.

This splendid organization of Granville Sowden, which was temporarily halted in its progress by a disastrous fire, has demonstrated courage and spirit in rebuilding in order to carry on a valuable service to the Community.

With encouragement from Dr. M. C. Rumbaugh, Mr. Sowden has brought to the business life one of the most modern buildings in Northeastern Pennsylvania—of which we can be proud.

Most of all, this institution stands as proof of the confidence of Mr. Sowden and Dr. Rumbaugh in the Back Mountain area.

This week should prove a colorful one in Back Mountain history as the Back Mountain Lumber Co. unveils its sparkling interior to the public.

The Luzerne Electric Division of UGI joins with business firms, neighbors and friends and the entire staff of the Back Mountain Lumber Co. in extending best wishes for success.

Such enterprise, courage and confidence as exhibited by the Back Mountain Lumber Co. merits sincere congratulations.

And, we at Luzerne Electric Division of UGI are proud to have been associated with the Back Mountain Lumber Co. in its progress.

### IT'S MAGIC! IT'S MODERN

Visit the most modern building in Northeastern Pennsylvania heated and cooled by an electric heat pump. The heat pump is an all electric year round air conditioning system that both heats and cools using only electricity and air.

Fully automatic. Set the thermostat and forget it!

The heat pump keeps your building or home warm in winter, cool in summer—changing from season to season, even hour to hour automatically.

It filters out dust and dirt throughout the year. The air you breathe is clean and sweet-smelling, free of pollen.
