**Squirrels Cut Down Pine Cones; State Wants Seed**

The Department of Forests and Waters' Division of Nurseries recently requested assistance in collecting pine cones and delivering them to State Forest Tree Nurseries.

For some time, squirrels have been cutting cones from White Pine and Norway Spruce trees. The cones will shortly open and disperse their seed.

The Division of Nurseries invites all cone collectors in the Commonwealth to bring the newly cut cones to one of the four state forest tree nurseries where they will be processed for opening and the seeds extracted. These seeds will be used in the production of millions of seedlings grown during the coming year in the State nurseries.

Individual collectors will be paid \$2.50 for every bushel of White Pine and Norway Spruce cones that they deliver to the Department's nurseries. Since this has been a very good year for these two species, the State's foresters hope to receive as many as several thousand bushels of cones.

Collected cones should be unopened, partially green, and recently picked or cut down. The cones should be kept in bags or baskets prior to delivery which must be made a few days following their collection so that they are not damaged by heat or mold.

Nursery superintendents at the State Forest Nursery will accept
