THE DALLAS POST Established 1889 "More Than A Newspaper, A Community Institution

Now In Its 73rd Year" A non-partisan, liberal progressive newspaper published every Thursday morning at the Dallas Post plant,

Lehman Avenue, Dallas, Pennsylvania. Member Audit Bureau of Circulations Member Pennsylvania Newspaper Publishers Association Member National Editorial Association

We will not be responsible for the return of unsolicited manuscripts, photographs and editorial matter unless self-addressed, stamped envelope is enclosed, and in no case will this material be held for more than 30 days.

When requesting a change of address subscribers are asked to give their old as well as new address.

Allow two weeks for change of address or new subscription to be placed on mailing list.

The Post is sent free to all Back Mountain patients in local hospitals. If you are a patient ask your nurse for it.

Unless paid for at advertising rates, we can give no assurance that announcements of plays, parties, rummage sales or any affair for raising money will appear in a specific issue.

Preference will in all intances be given to editorial matter which has not previously appeared in other publications.

National display advertising rates 84c per column inch. Transient rates 80.

Political advertising \$.85, \$1.10, \$1.25 per inch

Preferred position additional 10c per inch. Advertising deadline

Advertising copy received after Monday 5 P.M. will be charged at 85c per column inch.

Classified rates 5c per word. Minimum if charged \$1.15. Single copies at a rate of 10c can be obtained every Thursday morning at the following newstands: Dallas - Bert's Drug Store,

Colonial Restaurant, Daring's Market, Gosart's Market, Towne House Restaurant; Shavertown — Evans Drug Store, Hall's Drug Store; Trucksville - Cairns Store, Trucksville Pharmacy; Idetown — Cave's Market; Harveys Lake — Javers Store Kocher's Store; Sweet Valley - Adams Grocery; Lehman-Stolarick's Store; Noxen — Scouten's Store; Shawaneses — Puterbaugh's Store; Fernbrook - Bogdon's Store, Bunney's Store, Orchard Farm Restaurant; Luzerne - Novak's Confectionary.

Editorially Speaking: A Vanishing Breed? Sez Who?

People in the larger cities, sadly lacking in grassroots knowledge, deplore the passing of the old fashioned general practitioner and of the rural editor.

To this, we make the simple statement, Bushwah! Folks in the Back Mountain may rest secure in the knowledge that they have general practitioners, plenty of them, and also a newspaper that is rolling right along in spite of many tribulations during the past year . . . a newspaper that carries news of the community, the small but extremely important happenings which do not make front page news in the New York papers, but are of vital interest to our residents.

Judging by the cars which the general practitioners are running, the profession is flourishing.

And judging by the ads which The Dallas Post is carrying, the rural newspaper which carries tidings of life and death, and marriages and birth, is also feeling

This is a good community. It deserves good doctors

and a good newspaper, and it has both. But in case you don't have the lowdown on rural newspapers and their value to a community, tune in next Tuesday evening at 10:30 to Channel 16, and hear about a grass-roots newspaper down in Kentucky, when the McLean County News and its editor Landon Wills sit

for their portrait on "A Vanishing Breed." (Who says it's vanishing?)

A Great Crusade Begins

By Mrs. Frederick W. Anderson

April is with us again. Harbinger of new life and promise, it serves a dual purpose.

For as all nature swings into a lovely growing season and its sunlit days signal death to winter, so we, too, must labor that 88,000 among us may not die.

We are in the opening days of a great Crusade and from every street in every borough and township, an army is massing its forces.

The banner it follows indeed bears the symbol of a mighty sword but in this war it is a weapon of mercy and not of destruction.

Its soldiers are unskilled in the techniques of battle but throughout its ranks there are none more dedicated

So that others might live, free of the great scourge, they march. And their foe is Cancer!

Why do they march?

In hope that an additional 4700 children may not fall victim again this year; that 250,000 mothers will not have died in vain; that 300,000 fathers torn from their needed families will not have made the supreme sacrifice.

The foe creeps insidiously among us, respecting no one. Rich and poor, young and old, white or black, Christian or Jew, it claims with unrelenting invasion, one every two minutes.

The American Cancer Society needs your support. By research, education and service it can conquer. Open your doors and your hearts to its volunteers.

From—

Pillar To Post...

Joe Hoeg dropped around Easter evening to discuss this and that before returning to University of Maryland after the spring vacation, and the talk turned on the lost submarine. Joe has been doing some boning up on stresses and strains in metals, the changes that take place when a welding job is done, not in the weld itself, but in the surrounding metals.

Almost at once I was far over my head in technicalities, but bits

and pieces came back from a childhood spent in boundless admiration for a surgeon father who could do everything just a little better than anybody else could do it, and who held that surgery was simply applied mechanics. Watching Papa fashion a special surgical instrument, one designed for a specific job, I learned quite a bit by indirection about

metals. Papa explained that it was the rate of cooling that did the

trick, that if you wanted a soft result you cooled it slowly, and if you wanted a good hard brittle job you plunged it sizzling into cold water, and the larger the job the more difficult it was to control the cooling temperature. Papa hammered delicately, shaping his instrument on the anvil, and plunged it into the tub of water. Then he hammered out the other piece, and when he assembled the thing, it was a rib-cutter

with a particularly vicious snap to its jaws, in a baby size, just exactly right for the very small baby he was intending to use it on, a far smaller model than could be purchased at that time. After the operation was successfully performed, Papa sent the rib-cutter to be plated. There wasn't time to do anything in advance except fashion the life-saving bit of metal. It probably looked

odd, sterilized with all the shiny clamps and scissors scalpels but it did the trick Joe listened with interest, and then he returned to the submarine. If it could be snared at the end of a towing cable, he thought, it could be jockeyed up to the Continental Shelf into shallow water and examined more minutely than would be possible while

resting deep on the ocean floor. "Nobody would ever sell me a bill of goods on signing up for submarine duty," I ventured. "You'd be caught like a rat in a trap if anything went wrong."

"Now Mrs. Hicks, don't give me that stuff, you'd be the first to go down, and you're not fooling me a bit."

A horrid memory reared its head. It was in the harbor at Annapolis at least a hundred years ago. There was the submarine, fresh from the Spanish American War, one of the first models, lying at anchor off the Naval Academy, its oily surface lapped by small waves. And there was my great-aunt Delphine, gathering her voluminous skirts about her, and shaking her white curls, insisting upon climbing down the hatchway. It wasn't a conning tower in those days, just a small blister on the cigar-shaped surface.

Aunt Delphine could always be depended upon to make a diversion. On this occasion, she was restrained from boarding the submarine by a scandalized officer who clearly considered that elderly women should remain in the kitchen, doing whatever it is that elder-Iv women do in kitchens.

I was terribly disappointed. I had planned to slip aboard the submarine in Aunt Delphine's wake, after she had successfully negotiated the narrow ladder, but it was not to be.

And since that date, my enthusiasm for submarine has suffered a steady process of attrition. I could say with perfect truth Sunday night, and mean it, "No, Joe, you'll never get me on a submarine, so pack up your persuasive powers and get out of here, you have to go back to college tomorrow and bone up some more on metals. Who knows, maybe you'll be able to spot what was wrong, with that

And off Joe galloped, the best yard boy I ever had, and a boy the Back Mountain will be proud of some day. Joe is going places, a fine advertisement for what Dallas schools can do.

Guard The Arbrutus

As housing developments spread farther and farther afield, and woodland hills are shorn of their trees, the region is in grave danger of losing one of its treasures.

Year after year the trailing arbutus is disappearing, and when it goes, it never returns. It is impossible to transplant successfully. It resents interference. Children are not the only ones who tear it up by the

roots heedlessly. "Well, it's GROWING there, isn't it, and it isn't doing anybody any good, why shouldn't I take it home?" protests the picknicker with her hands full of the fragile pink blossoms. She crams the beautiful fragrance and the shell-pink

loveliness into a vase, and two days later all that is left of the trailing arbutus is a smallbunch of dry twigs. Throw it out. It was pretty while it lasted, wasn't it? Once, passenger pigeons darkened the sky. Uncounted millions were trapped for food. The supply was

endless. There would always be passenger pigeons. Came a spring when the flocks were not so large. Another spring when the flocks were perceptibly smaller. A spring when there were no passenger pigeons, and another spring when a substantial reward was offered for just one pair of passenger pigeons. The reward is still offered, but nobody has ever col-

lected it. Hopeful bird lovers have responded, but the

passenger pigeon is now extinct. Here in these hills we have a heritage for future generations. If you know where there is trailing arbutus, guard the secret from careless hands. If you pluck arbutus, pluck only a little, and take it with a sharp snip of the scissors, not tearing it up by the roots. Its woody roots extend under the surface. Disturb the roots, even by a gentle pull, and that portion will die.
