a Dog's Life

DOGS AND A GOOD NEIGHBOR POLICY

By Bob Bartos

Nothing leads to poor neighbor relations faster in either the country or city than owning a bratty dog.

Qualifying as such in the country is the fellow who digs up the neighbor's flower gar-

den; picks fights with the neighbor's dog, chases the neighbor's cat or barks endlessly.

In the city, it's the pooch who loves everyone and jumps up on people regardless of muddy paws, bounces around in the elevator, or who barks or howls interminably whenever he's left alone.

All these problems boil down to a single cause . . . lack of training and supervision. If your pet is properly schooled in obedience, even the neighbor who's not a devotee of dogs will come to tolerate your pet and may be inclined to look a little more favorably on all dogs as a result of his experience with yours.

The converse is true, too; a neighbor who formerly liked dogs may change his tune because of a few unpleasant experiences with your pet and form a distaste for all dogs.

Training your dog to be a good city or country neighbor involves teaching him a few basic commands, and knowing his whereabouts at all times.

He should understand the meaning of the word "no" so that he can be made to desist if he starts to dig in a flower bed or makes a move to jump on someone. "Come" is another command he should respond to immediately, should he start to wander away from his own back yard. "Sit" is a command that all dogs should obey, and "stay" belongs in every dog's vocabulary.

As for the lonely barker, the closer you are to neighbors, the more imperative it becomes that you break the habit with repeated scoldings and applications of folded newspaper to the backside.

Feeding Tip: A mature healthy dog needs no more than one good, well-rounded meal a day, which he gets if you feed him a top quality prepared dog food such as Friskies.
