**English Visitors Enjoy Local Lakes As Retreat From Humidity**

This summer has been a busy time for English visitors to this area.

Latest to depart for their homeland after a seven week stay in the Back Mountain were the parents of Mr. Peter Dean, Shrineview, and his brother, Tom Dean.

Mr. and Mrs. J. V. Rayner and their son arrived in New York just as the heat wave was beginning to encompass the East and it proved to be some climatic change for the folks from Hamsey Green, Wallingham, Surrey.

After a rest of two weeks to allow their relatives to adjust to the high humidity, the Deans took them to Washington, D.C., which was of great interest to the travelers. To escape the continuing heat wave, all embarked in a trailer for Niagara Falls, the major cities of Canada, Alconquin and the Thousand Islands stopping for a time at Hermit's Island, Me., where temperatures were a bit more pleasant and the scenery beautiful.

Upon their return, the favorite recreation spot of Mr. and Mrs. Rayner and Tom was Harveys Lake, where the young man swam to his heart's content and his elders relaxed by the cool water. Lakes being a scarcity in England, this proved one of the highlights of their stay. Britishers go to the ocean.

Tom was most impressed with the big cars, and wide highway lanes in the United States. This is in direct contrast to the traffic jams in England, where roads are not as wide and there are many more vehicles per mile.

Mr. and Mrs. Dean, the hosts, are also new to this area having moved here a year ago after residing in California and Maine. It seems hardly possible that the long awaited visit has come and gone, says Mrs. Dean and another pleasant interlude has ended. Mr. Dean's mother had visited them in 1960.

Trip over and back was made by jet, only six and a half hours return, a most delightful way to span the vast Atlantic Ocean.

**ACCUTRON**

This man may sound like a pest. Accutron owners often do. It's hard to blame them. After all, the Accutron owner knows the time is not 4:52, but exactly 4:51 and 19 seconds. And he doesn't mind telling anyone. In fact, he enjoys it.

This enjoyment comes from a little tuning fork, which Bulova uses in the Accutron movement instead of a balance wheel. It splits every second into 360 parts, and the time you keep is so precise that it's guaranteed in writing.

You'll be right within a minute a month.\*

An average of 2 seconds a day. This kind of accuracy could make a pest of the best of us.

Come in and we'll make an Accutron fan out of you. Accutron by Bulova. From \$125
