

Game Protectors' Field Notes

Land Manager William E. Fulmer, Bloomsburg, Pa. Area 3. While transporting farm equipment from Hoovers Island through the Susquehanna River below Selinsgrove, Herbert Thomas a member of the Food & Cover Corps, saw what he thought might be a mink swimming across the river ahead of him. After reaching shore the animal shook itself and headed for higher ground. Herb then saw that it was a large Weasel. Continuing on his journey to State Game Lands No. 226 near Millville, he passed a farm pond and observed a large red cat sitting at the water's edge with a very large fish in its mouth that looked like a rainbow trout and that was still alive. This same cat has since been observed at the same pond with other fish in its grasp. Who knows, maybe the landowner has found a new way to get his fish, in or out of season.

Land Manager John A. Booth, White Haven, Pa. Area 4. With the relatively open winter with an abundance of mast the recent snows have not been too hard on the deer as all road kills continue to carry a heavy fat layer. Should result in a busy summer picking up road killed deer and another large kill in deer season.

District Game Protector Philip S. Sloan, Tunkhannock, Pa., Wyoming County. The heavy snows may have caused some difficulty to the deer herd, but it may have been the prime factor in saving some of their lives; for no deer were killed on the highways in Wyoming County, to my knowledge, in February.

District Game Protector, Daniel S. McPeck, Matamoras, Pa., Pike County. Several people in various parts of my district have reported seeing bucks still carrying their antlers during the months of January and February.

District Game Protector George A. Dieffenderfer, Milton, Pa., Montour County. During the past month I have had numerous reports of deer being seen in all parts of the district. I have also seen more this year than in any previous February in the past five years.

District Protector Edward R. Gdosky, Dallas, Pa., Luzerne County. Highway killed deer have been closely examined this month for any

indications of malnutrition. All deer examined have been shown good bone marrow condition for this late in the winter. Two female deer were carrying twin fawns indicating good production. The deer examined were in good flesh indicating good browse condition are available in the county.

District Game Protector Richard W. Donahoe, Troy, Pa., Bradford County. Troy High School FFA Students again placed winners in the FFA Wildlife Habitat Improvement Project. They dominated the Northeast Division by taking all the prizes and placed a runner-up in the state wide contest. Congratulations to all the winners and especially to Sam Davey, Vo-Ag teacher at Troy High School. Mr. Davey's interest in conservation on the farm is recognized each year when one or more of his boys makes the winners list on this Commission sponsored project.

District Game Protector A. Dean Rockwell, Sayre, Pa., Bradford County. Although I have often seen summer birds in the winter such as robins and mourning doves I was very surprised the other day to see three meadow larks. This is the only instance I have ever known of their staying during the winter.

District Game Protector Donald E. Watson, Towanda, Pa., Bradford County. A recent check of turkey feeders in this district revealed that all feeders are being used by turkeys despite the fact that we have had a relatively mild winter. Many deer, squirrels, grouse and song birds are also taking advantage of the corn filled feeders.

District Game Protector Howard W. Bower, Wilkes-Barre, Pa., Luzerne County. Reports from trappers, deputy Game Protectors and personal observations indicate that our otter population in this district is quite stable. During the month of February two otter, were taken by the same trapper in Bear Creek Township.

Smorgasbord

Woman's Society of Christian Service, Lehman Methodist Church, will sponsor a smorgasbord in the church dining room on Wednesday, March 23, serving to begin at 5 p. m.

Understanding Needed

As I awoke this morning, I found to my surprise that it had snowed again. I began to think that God does not, and will not ever forget the world he created for his human family.

My only thought is how we forget, and that only for his love from his great heart could he ever forgive us.

He sends to earth rain for our thirsty bodies and the heavenly Word for our souls.

So instead of finding fault we should let God know that we can and will try a little better along a sometimes trying and lonely road.

God does not forget, and as we sow, so shall we reap. Let's all try during Lent to get on the road to

better Christian living and love one another in the brotherhood of man.

Let's exchange the word "hate" for the word "love," and prove our worth on earth.

Go to church.

by Corinne Jones.

Public Notice

To the residents of Kingston Township, Luzerne County, Penna. A public meeting will be held at the township building on April 5, 1966, at 8 p.m. The purpose of the meeting is to consider rezoning from A-1 agricultural to R-1 residential the following piece of land: that piece of land on the southern side of Carverton Road opposite Frances Slocum State Park starting at Bunker Hill Road and running northeast to and including the Sul-piski property, a distance of approximately 6/10 of a mile, and extending back from Carverton Road 300 feet.

VALENTINE, ATTY., 35 N. FRANKLIN STREET, WILKES-BARRE, PA.

accept or reject any or all bids or any part thereof of any bid.

By order of the Board of Directors of the Dallas School District
Dallas, Pa.

Harriet Stahl
Secretary

why does the fish in Cap'n John's frozen fish dinners taste fresh-cooked?

Because you cook the fish.

It takes no longer than heating pre-cooked frozen fish...only 20 minutes.

You see, we're sort of fanatics about fresh fish flavor.

So we refuse to pre-cook the fish.

Here's what we do:

We dip the fillet in milk batter.

Bread it. Top it with butter.

We blanch the peas.

Partly cook the potatoes.

So everything's done at once (in only 20 minutes) when you cook it.

The result.

A fish dinner that tastes like the fish is fresh-cooked.

It should. Because it is.

One important tip.

Be sure the oven is really pre-heated to 400° F.

Are our Cap'n John's Frozen Fish Dinners a good reason for shopping A&P?

They're one of many.
