### Power Lawn Mower Cautions

Use common sense and you'll have no power lawn mower accidents.

Robert S. Horn of the Department's Division of Environmental Safety said a large majority of power mower accidents are a result of carelessness on the part of the operator. By following a few simple rules most of these accidents can be prevented.

Horn offered these suggestions for a summer free of power mower accidents:

1. Read the operating procedure manual for the mower.
2. Keep mower in top operating condition.
3. Fill gasoline tank out-of-doors and away from any possible sources of fire. Never fill tank when engine and exhaust are hot.
4. Stand away from mower when starting; be sure it is on level ground.
5. Mow during daylight hours and when grass is dry.
6. If mower is self-propelled, keep in step with it. Don't let it pull you along.
7. Never walk in front of a grass discharge chute when mower is running.
8. When mowing an incline, move
