## More Teachers Leave

The loss of six more teachers, Edward Heltzel, Robert Howells, Kenneth Kirk, Mrs. Juanita McEvoy, James Morgan and Lois Krommes led directors to question why so many of the faculty were leaving the district.

Thomas Jenkins, senior high school principal, to whom the question was directed replied, "Salary. We have lost eight teachers in the high school. When our salary schedule was good, we had plenty of good teachers applying for jobs. Now other districts are contacting our good teachers."

Harry Lefko reported the survey on the baseball field at the senior high will probably be done next week.

Robert Methot, representing Roushey, Smith and Miller, architects, said he did not think his company engineer would go along on test borings done previously since design of the new building foundation depended upon their own testing. Solicitor Jonathan Valentine said it was the school board's responsibility to see that the bus contractor had proper insurance and this had been done, Mr. Kozemchak said, "Morally you are right, but there are certain procedures we must follow. It is strictly in the hands of the insurance company."

When Mrs. Dennis said the school buses were over-crowded, Mr. Kozemchak said he had ridden the buses and found no over-crowding. He also read an extensive report on the accident.

## Abdominal Support FOR LONGER LIFE

Why do widows outnumber widowers? To the traditional team of work and worry, long branded the guilty pair, weight has been so strongly linked by science that dieting, once a woman's pastime, has become a male preoccupation.

And now comes evidence that it isn't just the paunch, but the sag, that brings on the pallbearers—that the girdles that give the ladies their girlish figures may also be extending their lives.

The idea that control under shorts, tightening the abdominal muscles and expanding the chest, improve not merely appearance but health isn't exactly a new one. Long before modern drugs came on the market, doctors prescribed abdominal belts for men with heart ailments.

But new research, reported in the Journal of the American Medical Association, tends to show that the new drugs may be no more effective than the old-fashioned belts—or the modern control shorts. Scripps Institute scientists found that "application of the belt previous to exercise reduced or prevented the abnormal postexercise increase in the amplitude of the A-wave of the apex cardiogram," just as popularly-prescribed glyceryl trinitrate.

How do control shorts help the heart? One famed medical writer, Dr. P. J. Steincrohn, writes that it helps the circulation of the blood, and "thereby takes an unnecessary load off the heart. And when one multiplies this by the heartbeats which add up to a few billion in the normal lifetime, one can understand how a simple abdominal support might add years to a man's life."

Many doctors are suggesting the increasingly popular new types of men's control shorts to their patients, and finding back and breathing as well as circulation benefits. The most popular type, Mandate, "underwear that slims," meets the Medical Journal's prescription of a belt "tightly applied to the abdomen in such a manner that it does not disturb the patient's respiration or produce discomfort."
