Ask To See Some!

DOG'S AGE COMPARED TO MAN'S By Bob Bartos, Manager Friskies Pet Foods Research Center

Figuring Fido's age in terms of human years has always been considered a mere matter of multiplying his years by seven. According to this formula, if your pet is two years old, he's the equivalent of a fourteen-year old human. Yet he's expected act considerably more ma-

to act considerably more ma-ture than a teenager. Recently scientists have come up with a much more realistic ratio. With the new formula, the year-old dog corresponds in development to a 16-year old human. From these the new begins to near there the gap begins to nar-row. It's 2 years against 24, 3 years against 35. After that each human year is equiva-lent to 5 dog years.

While this formula your dog into his fifties faster than the old one, it slows his aging down when he reaches the crucial sixties. The 12-year old, for example, will be a spry 75 instead of a tottering 84.

It's not only a new formu-la, however, that's knocking years off your dog's life. Improved veterinary care is the chief factor. Many common canine diseases that formerly were fatal can now be pre-vented by vaccination.

Owners, too, can claim their fair share of responsibility for the longer lives of their pets. They're giving them better care and feeding prepared dog foods fically formulated to scientifically formulated to meet the dog's every nutri-tional need. They're also con-trolling them better, which means that fewer are losing their lives to autos

Feeding tip: The best way to be sure your puppy de-velops good sound bones is to feed him a prepared food such as Friskies Puppy Food which is especially formu-lated for his every growing pequirement zequirement.

"A million dollars might have given some leeway to the Legislature and the governor in 1873 when the annual budget was less than \$7 million, but it has lost its flexibility for today's annual budget of 025 billion.'

The second briefing involved Willian G. Willis, vice president and secretary of Temple University who discussed the problems of local government, another of the four issues on which the convention will focus in its deliberations.

"The question is," said Willis "does local government function today within a constitutional theory that really fits our times? Is local government only a purveyor of public safety, street, water and sewer services? Or is it indeed a fullfledged partner in the shaping of a brighter, fuller, more humane society for all of us?"

Warning that philosophic bouts on questions of this sort are unavoidable, Willis added:

"You can't wrestle with Constitutional questions like Home Rule powers, or local structure and organization, or municipal boundary changes, or the extremely delicate subject of area or regional government, without committing yourselves in some fashion or another to a philosophy of local government as you see it functioning in the years ahead."

# ELSTON and GOULD TIRE SERVICE MEMORIAL HIGHWAY, DALLAS

LUZERNEZELECTRIC

Division of the UGI "Helping Build A Better Wyoming Valley"

Between this scene of a coach and four arriving at a country inn and the marvels of the space age, there are many contrasts. As we greet our friends at the New Year, we would wish for today's world the best of both times-wholehearted acceptance of new challenges, with continued appreciation for the "old-fashioned" ways of warm cordiality. We greatly value the generous share of such cordiality we enjoy in our pleasant association with our customers, and it is a constant support to us in our endeavors. Happy New Year!
