The Accutron timepiece has no balance wheel, no mainspring, no hairspring. (Therefore no tick). Instead it has a tiny, electronically-powered tuning fork. (That's what makes it hum.) The tuning fork splits a second into 360 equal parts. The best a ticking watch can do is divide a second into 5 or 10 parts.

Accutron time is so nearly perfect that Bulova guarantees monthly accuracy to within 60 seconds.†
