Antiquing Joel Sater

The original of this restored patent 5774-X is in color and shows that the early inventor was already thinking beyond the confines of his invention toward a powerful brochure to sell the product to

"Early Patent Papers Ripe For Researchers"

crafting and machine United States Patent Office make it quite clear that Americans officially registered their interest and enthusiasm for mechanical improvements as early as 1790.

dimensional drawings, whimsical decorations and Madison Avenue sales talk. A congresrestoration of the damaged! pieces and over the years much was accomplished in that direcchives in anyone has the time

Most of the patented inthe drawing board. So one furniture that had spare space cannot study them with the idea inside of learning what was actually made and what was not. The Patent Office only issues the patent. The inventor or his agents must build the product and promote it in the market place. The history of patents shows that as a rule the inventor benefited the least from his invention. There are of course great exceptions like Edison, McCormack the reaper man, Wrigley the Chewing Gum man and Charles Goodyear. But

Though many antiquers like was a quiet little guy with a milto set the year 1830 as the lion ideas for improving every-dividing point between hand one's way of life. After he got his patent the promoters got him! They would buy it for a song and everybody's way of life would be improved but his.

The old patents show that American's have been materialists from the beginning. Way back then they searched for In 1836 fire destroyed, ruined magic gimmicks to ease the or spoiled most of the patent world's burdens and make the records and drawings.
