freeze cranberries

Buy fresh cranberries while the supply is good and put them into the freezer in the package in which you buy them, and you can enjoy the taste of fresh cranberries the year-round, says Ruth J. Buck, extension foods and nutrition specialist at The Pennsylvania State University. When ready to use the berries, give them a quick rinse in cold water and then chop or grind them in their frozen state or cook according to directions on the package or in your cookbook.

During the past quarter century the sound levels found in our cities have increased hundreds or even thousands of times. The vastly increased automobile traffic in major metropolitan areas is one of the chief causes of louder urban noise.

Hawaiian tribesmen defeated in battle noncombatants, and those who broke sacred taboos found sanctuary in an area of the Island of Hawaii which the National Park Service now preserves as City of Refuge National Historical Park. Custom permitted such social outcasts to return unharmed to their society when the fighting ended, or when the taboo breakers had been purified by the priests, if they succeeded in reaching this sacred place without being captured.

CALL FOR ACTION

(continued from PAGE ONE)

problems are included among calls the referral service has answered.

One of the far-reaching effects of Call For Action, the chairman predicts, will be that government planning agencies will soon know where there is a lack of help for troubled persons.

"We already know from the calls that have come in to us that while there is an agency which deals with the problem of child abuse, there is no group or agency to handle the problem of abuse or neglect of the aged," the chairman stated. "We have discovered a number of older people in this area who have been left to shift for themselves, completely without the help of family or friends."

SCHOOL PLANS

(continued from PAGE ONE)

Tentative building plans include converting the present Lehman-Jackson Elementary School to a junior high school. The expense involved in this would be minimal, Mr. Belles pointed out, because the school was once a senior high school and necessary facilities such as showers, a gym, and stage area have been kept intact. "We'd have to raise the blackboards, install a home ec. room, a few things like that," Mr. Belles noted, "but on the whole it would be a lot cheaper to build a new elementary school than a junior or senior high school."

Friendship Class plans festivities

YOU CAN TELL AT A GLANCE THAT IT'S DIFFERENT.

Sure, there are other watches that will tell you the time, the day, and the date. But see that tiny HS 360 marking on this one's face? It signifies a remarkable heart: 36,000 beats an hour. Which is pretty hard to beat for a high-frequency movement. (It keeps time to within a minute a month!)

The truth is: This is the only day and date watch with this HS 360 movement. So accurate it actually waits for the stroke of midnight to read the new day.

The Movado Kingmatic HS 360. It tells it like it is.
*We will adjust your Kingmatic HS 360 to this accuracy if necessary.

Kingmatic HS 360 day & date; self winding; water resistant; exclusive quickset calendar in stainless steel with matching bracelet (either style).....\$160.
In stainless steel back with yellow electroplated bezel (either style).....\$185.
