EASY WAY TO APPLY TIRE CHAINS

With a little "know-how" and practice, it can be done in 6 minutes, without a jack and without getting your clothes dirty.

STEP NO. 1 Spread the chains on the ground behind the rear wheels to remove tangles. Hooks should be to the rear. Reinforced chains are best and the projecting teeth or cleats should be facing up.

STEP NO. 2 Gather the chains behind the tire so they won't catch the fender, and attach the end links to the "chain applicator," a simple spring steel wire that is easily slipped onto the tire.

STEP NO. 3 Drive the car forward about one wheel revolution, so that the applicator carries the chains around the tire.

STEP NO. 4 Remove the applicator and fasten the inside hook first, then the outside hook. With a little practice the inner hook can be fastened by "feel" without getting under the car.

Some children have to do without a childhood.

Will yours? If something happened to you would your kids have to take on grownup responsibilities and worries? Not if you protect them with a Prudential insurance program. And don't be afraid of the cost. Call me and I'll show how inexpensive protection can be.
