

# Candidates Discuss the Issues

continued

Floyd B. Whitebread

up to date, and of course it all takes time and money so it'll have to be done over a period of time; it can't be done right away.

Background: Graduate of Coughlin High School, has lived in Harveys Lake for 31 years. A master mechanic until in 1948 formed water pump sales and service company. Owns Whitebread Water Company at Outlet.

Donald Hanson (R) Box 266, Rd 1, H.L.

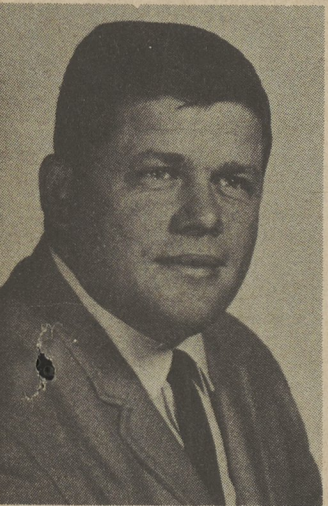

There are problems no matter where you're at and out here we do have the sewerage problem like everybody else. I can't say what specific problems there are because there are a lot of problems in all the communities so I'd just like to get in there and try to help out as much as I could.

Background: Resident of Harveys Lake since early 1930's. Attended Lake-Lehman High School for two years. Owns and operates Hanson's Amusement Park at Harveys Lake. Married; has four children.

Francis D. Fisher (R) RD 1, Box 77F, H.L.

The obvious problem of paramount importance to the community of Harveys Lake is the realization of a sanitary sewer system. Few opponents of a sewer system can now justify their argument from the position of not being necessary. All available information, based on scientific research, points to the unavoidable conclusion that the lake is rapidly becoming unsafe for bathers as well as fish life. Second only to a sanitary system in importance to the borough is the adequate control of storm water. It is hoped that information revealed in the solution of the sanitary system can be put to dual use in controlling the many areas of the community which experience flooding during heavy rains usually associated with the spring thaw.

Background: Larksville native, has been a permanent resident of Harveys Lake for eight years. Graduated from Larksville High School, Kings College, and Rutgers University. A teacher by profession, is employed at the present time as an engineer by Addy Asphalt Company. Married with four children.

Francis Fisher

Arden Llewellyn (R) Pole 128, Box 279, Lakeside Dr., H.L.

The primary problem here it seems it's a Republican borough but we've had a lot of Democrats change over to Republicans. They come from other parts of the county and they've moved here and some way or other they took over. The people I've talked to here just aren't satisfied; they know there's something wrong but they can't put their finger on all of this. I'm a Republican and I stand up for Republicans but I'm for everybody. The people here just can't seem to get it through that the government isn't what they want that's here. They're bickering and fighting over every little drop of the handkerchief. Somebody has to step in and tell somebody where

to get off at, somebody that isn't afraid and I'm not afraid of anyone. I've argued; my name's been in the papers thousands of times but the people still elected me so I figured maybe I could help them out here.

Background: Attended Pittston High School. Served for nine years as councilman in Forty Fort where headed street committee and served on police committee. President and former secretary of Printing Pressmen's and Assistants' Union, Local 137. Employed as pressman at Times-Leader newspaper.

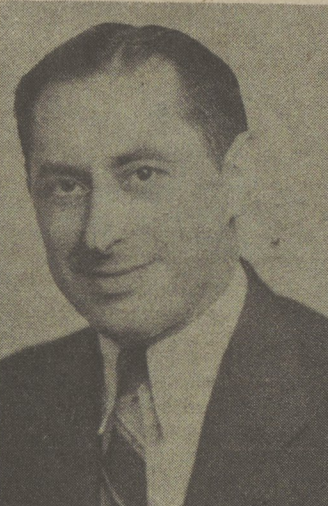

Arden Llewellyn

David R. Price (R) RD 4, H.L.

Just about all of our problems could be solved if these people would stop these delaying tactics. If they would sit down and work together—which is impossible because of one man—we could have a beautiful government out here. The biggest problem is the lack of cooperation between the members of council.

Background: Graduate of Nanticoke High School, Mansfield State Teachers College, and Bucknell University. A teacher for 28 years, 24 of which were spent as physical education instructor, health and U.S. history teacher at Lake-Lehman High School. Married, with one daughter. A resident of Harveys Lake for 25 years.

David R. Price

Bernice Kocher (R) Box 286, RD 1, H.L.

The one and only problem we have here right now, the big thing, is sewage. We definitely have to have sewers; I just hope we go about it in the best possible way for everyone. The only way to go is to progress the way they're going. I hope we go in with the Back Mountain; I'm definitely in favor of this. There are many other things that should have been done long ago, but to numerate on them, well, I think we sort of got off on the wrong foot here. We do need a road program here, but with the sewers coming I think this has to be thought about awhile.

Background: Native of Harveys Lake. Graduate of Lake Township High School and Wyoming Seminary Dean's School of Business. With husband owns and operates Kocher's Market. Elected to two year term of office as councilwoman when Harveys Lake Borough formed.

Bernice Kocher

Robert D. Wintersteen (R) 265A, RD 1, H.L.

The problem as I see them are lack of unity and harmony among council members. This gives the borough a poor image. There should be a promotion and development of the borough as an attraction, rather than a sink hole. Lack of sewers are causing one of the biggest problems. It's necessary to have a sewer system."

Qualifications: Has lived at Harveys Lake all his life—29 years—and owns amusement park property. Attended Kingston High School and Lock Haven State College. Is a member of Harveys Lake Lions Club, Daniel C. Roberts Fire Company and ambulance, and is assistant director of Luzerne County Soil and Water Conservation. Other activities include serving as secretary-treasurer of Luzerne County Beekeepers Association and board member of Pennsylvania State Beekeepers Association. Works as a construction electrician.

Forrest C. Sorber (R) RD 1, H.L.

The biggest problem at the lake is sewage. A sewage program is long overdue—this program should have been started before because, as I understand, being it's taken so long they lost money they could have gotten through HUD. Sewers are badly needed, not only because of the pollution to the lake, but ecologists have made studies of this and in years to come it's a proven fact that it will pollute the fresh water supply if adequate sewage facilities all over aren't put into effect.

Background: 1951 graduate of Lake Township High School. Returned to Harveys Lake two years ago after serving as police officer in New Jersey. Is presently a truck driver. Married with three children.

## KINGSTON TOWNSHIP

Edward W. Hall (R) 113 N. Memorial Highway, Shavertown

The most serious problem we've had for years is water and sewers. We are getting somewhere with the sewers but as far as the water is concerned, this is still the problem. While a lot of people are upset about the sewers right now, I think they're going to be happy they're in. As far as the water is concerned, that's in the hands of the water commission and the last meeting they had they seemed to be making some progress.

Background: Graduate of Dickson City High School and Philadelphia School of Pharmacy. Former owner of Hall's Pharmacy in Shavertown; in pharmaceutical business over 50 years. Resident of Kingston Township since 1933. Married for 50 years; three children, four grandchildren. Has served six years as township supervisor. Presently is chairman of Kingston Township Board of Supervisors Member United Penn Bank advisory board and Shavertown United Methodist Church.

LaRoy Ziegler (R) RD 3, Wyoming

"A careful stewardship of township revenues is mandatory at this time to forestall anticipated losses in revenue. The primary function of good municipal government is the care, maintenance and repair of township roads."

Background: Attended local and Kingston High Schools and the University of Pennsylvania Wharton Extension School. Has lived in Back Mountain 45 years. Served two 6-year terms as supervisor of Kingston Township; was chairman of supervisors' board for seven years. Is semi-retired, but still connected with firm where he served as sales representative for 27 years.

## LAKE TOWNSHIP

Nesbitt Hummel (R) Rd 1, H.L.

I don't believe in raising taxes—that's my slogan right there.

Background: Appointed as road supervisor when Lake Township separated from Harveys Lake Borough in 1968. Attended Green Valley School

House. Widower; has one daughter.

Jasper Kocher (R) RD 1, Noxen

My first wishes would be to work for the benefit of the taxpayer, that would be my first thing to do. Our township financially is in very bad shape right now and I would like to sit down after the election and count the pennies coming in and see how we can better use them. Our equipment is almost worn out and there's no provision to buy any new, that's another thing I would look into very much. I'd like to see more paved roads in Lake Township—we only have a very few miles of paved roads against the miles of dirt roads.

Background: Born and raised in Lake Township. Employed by Sordoni Construction Co. for 25 years, is now superintendent of building. Attended Lake Township High School. Married; no children.

LEHMAN TOWNSHIP  
Frank E. Crossen (R) RD 2, Hunlock Creek

In a township you can't achieve too much—only not to raise taxes. I'm qualified and experienced and am a conservative candidate—and I would try very hard not to raise taxes. I'd also work to improve the roads as much as I possibly can.

Background: Attended Lehman Township High School. A life-long resident of Lehman Township. Sixteen years experience with Pennsylvania Department of Highways, employed there as assistant supervisor and foreman. Presently employed as roadworker by Lehman Township. Widower; has three daughters.

Frank E. Crossen

William Samuel (R) RD 2, Hunlock Creek

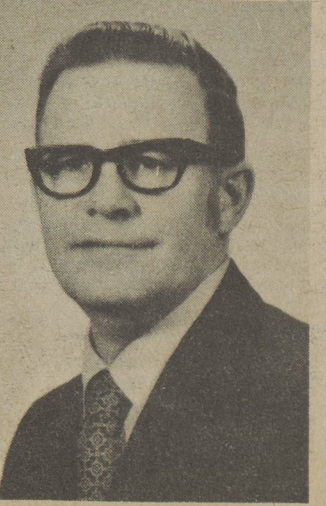

"I think a municipal building is needed badly. Equipment should be protected. The township owns a good deal of its own equipment, such as trucks and snow plows, and this valuable equipment needs good storage area."

Background: Retired in 1955, and can devote considerable time to municipality business and operations. Has served as a supervisor for past nine years, but comments that he is "still learning." Lived in Lehman Township since 1950, but was born in Nanticoke and attended Nanticoke High School. Graduated from Bucknell University, with a degree in mechanical engineering.

## DALLAS BOROUGH

Robert W. Brown (R) 40 Hickory Rd., Dallas

I would like to sit down and go over the salaries of the roadmen. You can't pay starvation wages and then say to the guy 'we'll fire you if you don't work all day.' This would go for the police, too; if they're underpaid, I think they should definitely be paid a living wage. I don't say raise taxes to do this—I say, let's go over the budget and shave wherever we can

Robert W. Brown

possibly shave; if there's waste, then let's get rid of the waste. My whole theme is 'a friend and a voice'—when people have a complaint they'll know who they can come to.

Background: Life-time resident of Dallas Borough, educated in borough school system, Wilkes-Barre Business College, Wilkes College, Graduate School of Banking, Rutgers University; Pennsylvania School of Banking, Bucknell University; N.J. School of Automation, Princeton, N.J. Presently serves as vice president and cashier of The Plymouth Bank. Previously Dallas Borough secretary, justice of the peace, and Dallas mayor. Member of Dallas Methodist Church, George M. Dallas Lodge, Irem Temple; presently a director of Back Mountain Memorial Library. Married with two children.

Harold L. Brobst (R) 110 Pine Crest Ave., Dallas

"Frankly, I see no major problems. There are some minor things we have to tackle, but this has always been true. When we progress, we have problems to overcome."

Qualifications: Has served 16 years on Dallas Borough Council, and is familiar with all phases of borough business. A native of Dallas, he attended the local school system. Is married, with three children, and is self-employed.

George H. Thomas (R) 91 Sterling Ave., Dallas

"Getting roads replaced after the sewers are finished is going to be a big problem. This is probably the worst problem, although there are some minor things."

Qualifications: Has lived in the Back Mountain for a long time and feels he is familiar with problems of area. Is currently serving as a council member and is chairman of recreation committee. A graduate of Penn State University, he is associated with institution food sales and manufacturing. Married; has two daughters.

Robert W. Parry (R) 50 Monroe Ave., Dallas

"The problem that concerns me is getting borough roads back in A-1 condition when the sewers are completed. The sewer construction companies are supposed to restore them, and I would not like to see the borough have any of this expense. As chairman of the borough finance committee, I really try to operate the borough as a business."

Qualifications: Has served on council 12 years and heads finance committee. Is employed by Acme Markets as general superintendent. Is responsible for operation, sales and profits for 26 stores. For civic activities and service, was chosen "Man of the Year."

Edwin R. Delaney (R) 23 Norton Ave., Dallas

"I believe we need borough housing for the elderly. With added burdens of sewer assessments and other expenses, it is hard for persons with fixed incomes. Funds are available for housing. It won't be done next spring, but we can do it."

Qualifications: Graduate of Lake Township High School and Marshall College, Huntington, W. Va. Has owned his own bottled-gas company for 21 years. Serving his first term on council (is in his 4th year), was elected president of borough council. Is active in Dallas Rotary Club and other civic organizations.

## MAGISTERIAL DISTRICT 3-8

Edward Bogdon (R) 96 McDonald St., W. Nanticoke

"I believe that curfews for teenagers should be enforced. Also teenagers should be taught good driving and safety habits. In my work as a law enforcement officer, I have helped to patch many a broken home and helped to get families back together."

Background: A West Nanticoke native, he attended local high school. Was in police work for 19 years, serving as chief for 10 years. Has attended several police schools sponsored by State Police; also juvenile seminars.

Leonard D. Harvey

Leonard D. Harvey (R) 21 Woodlawn Ave., Dallas

The most important job a district magistrate has is seeing to it that the people get fair treatment by the court. In the days before the magisterial system was established J.P. often meant judgement for the plaintiff—the police were almost always favored in any decision because many J.P.'s depended for their income on the number of cases brought to them by the police. Obviously, if they ruled against the police, the police would bring their cases to another Justice of the Peace.

Background: Born in Harveysville, has resided in Dallas Borough for 50 years. Graduated from Dallas Borough High School; has attended many State-sponsored criminal and civil training courses at Wilkes-College. Served as Justice of the Peace in Dallas Borough for many years. Appointed by President Judge Bernard Brominski to fill vacancy left by death of District Magistrate Harold Major. Previously employed for 37 years by American Chain and Cable Co. Married; has daughter and grandson.

William E. Price

Andrew J. Strutko

Charles Sewell (R) Lakeside Hotel, Box 71, H.L.

"We have to have closer understanding between the younger generation and ourselves. There must be better communication in juvenile matters."

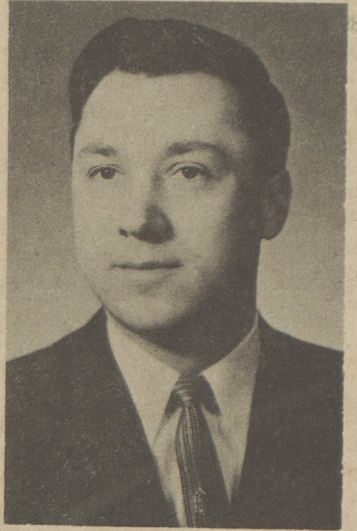

Qualifications: A graduate of Duke University, Durham, N.C., has been employed by Bethlehem Steel Corporation for 15 years. Is serving presently as treasurer of Harveys Lake Fire Company, a new fire company at the resort area. Is deeply concerned and interested about civic betterment in the Back Mountain.

Ernest Ashbridge

Patricia A. Gregory (R) 330 Carverton Rd., Trucksville  
Ernest Ashbridge (R) 90 W. Mt. Airy Rd., Shavertown

Dr. Norman J. Wienckowski

## COUNTY REPUBLICANS

OUR DA SAYS  
POLLUTION IS A PROBLEM

OUR BIGGEST PROBLEM IS THE  
POLLUTION OF OUR YOUTH

Youths have been prosecuted by our DISTRICT ATTORNEY for possession, control and use of marijuana and other illegal drugs which is proper, under our law.

## REMEMBER PROHIBITION?

Bootleggers who sold alcohol to the young people were arrested, prosecuted & convicted.

In Luzerne County today, the illegal drug suppliers and pushers appear almost immune to arrest, prosecution & conviction!

## REPUBLICANS

If you care for your children, nominate a man who will really work to protect them from real pollution.

ON MAY 18—PULL LEVER 4-D

JOE KASPER

FOR DISTRICT ATTORNEY

Friends of Joe Kasper, William Hoblak, chairman.
