

Back Mountain Residents Form Environmental Clearing House

The environment of the Back Mountain—and what can be done to improve it—was the topic of discussion at a breakfast meeting held recently at the Irem Temple Country Club and attended by representatives of several area service clubs and organizations.

Plans were initiated to form a committee which will serve as a clearing house for ecology-related projects proposed by various organizations in the community. A spokesman for the group suggested that efforts by many service-oriented clubs to improve the environment in

and around the Back Mountain have been repetitious and, subsequently, have not been as valuable as if they had been planned cooperatively. It is the intention of the newly formed environmental action group to take steps to avoid this overlapping of efforts through closer communication and careful planning.

George McCutcheon, a delegate to the meeting from the Kiwanis Club, suggested that there was a great deal of interest in establishing such a clearing house and that the ideas offered by the new committee members afforded many opportunities for "clean-up" projects. "It's impossible to tell where we're going at this point," Mr. McCutcheon stated, "but the possibilities are very exciting." The group will meet next at the country club Jan. 29. All interested persons are cordially invited to attend.

Christmas Snow

Christmas is a time of year When people like to sing and cheer. The winter snow likes to drift And make the children feel so swift. On Christmas Eve the children listen To hear the reindeer Donner and Blitzen. In the morning they awake, And the presents they will shake. When the presents are opened, Then the Christmas secret is broken.
