George to assist USAF recruiter here

Airman Paul G. George, a recent graduate of the Air Force's Technical Training Center at Chanute Air Force Base, Illinois, and a 1977 graduate of Bishop O'Reilly High School, has returned home to assist his recruiter under the Recruiter Helper Program.

Recruiter Helper enables selected firm-term airmen the opportunity of returning to their hometowns for temporary periods of time to discuss Air Force opportunities with potential enlistees.

"AMN George, 19, son of Mr. and Mrs. Peter George of 165 Youngblood Ave., Shavertown, Pa., has volunteered to assist us in our recruiting efforts," said Staff Sergeant John E. Tunstall, Air Force recruiter here.

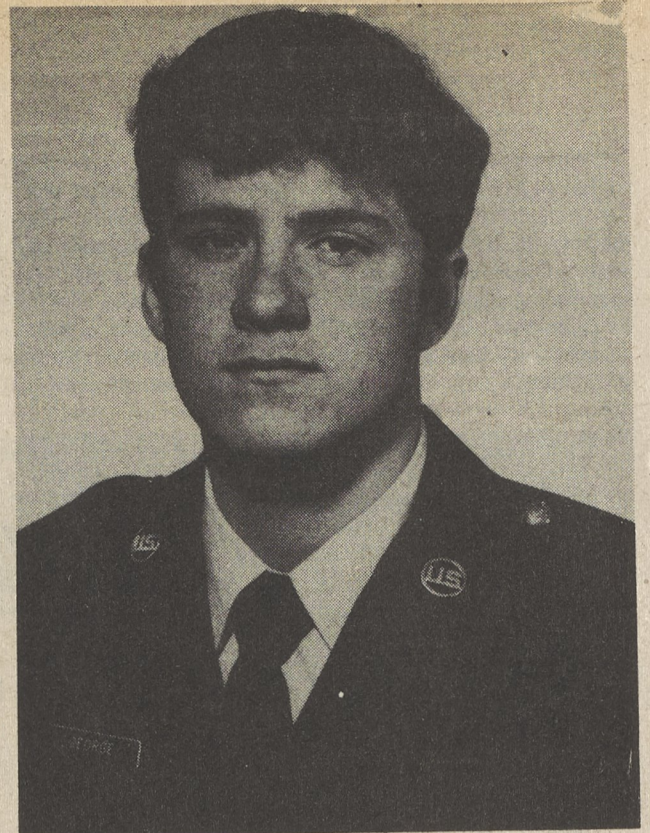

"It has long been our contention that no one can communicate better what Air Force life is really like than those who have just completed basic military and technical training at one of our centers. The Recruiter Helper Program allows our first-termers the chance of sharing their experiences with other potential enlistees."

AMN George selected

training as an Environmental Systems Specialist, prior to entering the Air Force's Delayed Enlistment Program in Dec. 1976. Prior to attending Chanute AFB, Illinois, he completed six weeks of basic military training at Lackland Air Force Base, San Antonio, Texas. He is presently assigned to

Loring Air Force Base, Maine.

"While here," explained SSgt. Tunstall, "Airman George will be visiting his old high school with me and answering any questions interested students may have about the Air Force. He will also be available at my office at 19 North Main St., or may be reached by calling 823-5117.

CAN WE HELP YOU LOWER YOUR ELECTRIC BILL?

Rate RTU, our new optional rate based on time of use, can help many UGI customers lower their electric bills.

Whether you should consider using Rate RTU depends on the rate you're billed on now and how much electricity you use. If you don't know your present billing rate and the amount of electricity you use, look at your most recent electric bill.

Under the column headed "Class" you will find R-residential general, RW-residential water heating or RT-residential total electric. The column, "Kilowatt-Hours Used," shows how much electricity you use.

Should You Consider Changing to Rate RTU?

Read the statements in the coupon and check all that apply to you:

- 1. I'm changing my heating system, and my home is or can be well insulated.
- 2. I'm changing my water heater.
- 3. I'm building a new home.
- 4. I don't use electric heat or an electric water heater. I am billed on Rate R, and I use between 300 and 1200 kilowatt-hours each month.
- 5. I have an electric water heater and am billed on Rate RW.
- 6. I have a total electric home and am billed on Rate RT.

If you checked 1, 2, 3, or 4, you should definitely consider Rate RTU because it could save you money.

However, if you checked 5 or 6, you are already on the best possible rate for your home, and you should not consider Rate RTU.

Return coupon to UGI at 247 Wyoming Avenue, Kingston, PA 18704. A customer service representative will provide more information.

Name _____

Address _____

Phone No. _____

Remember, the key to Rate RTU is the time of day you use electricity.

RTU offers electricity at 1.5¢ per kilowatt-hour during off-peak hours (11 P.M. to 7 A.M.), and at 3.5¢ per kilowatt-hour during on-peak hours (7 A.M. to 11 P.M.)* In addition, Rate RTU offers savings to customers who install electric thermal storage home heating and water heating equipment.

*Plus applicable power cost adjustment and Pennsylvania tax surcharge, both of which apply to all electric rates. Minimum RTU monthly charge is \$9.00.
