## Dallas Rotarians will hold turkey dinner

Dallas Rotarians this week invited area residents, their friends and neighbors to their annual turkey dinner, scheduled for Oct. 7 at the Dallas High School cafeteria. Dinner Chairman Bob Coscia said tickets were already available from club members and that adult dinner prices

remained the same as last year, \$3.50 each. Children's tickets are available at \$2 per person. There is no extra charge for takeout dinners. Coscia said the dinner has established a long tradition of quality and value and has many loyal patrons. The menu again this year includes fresh

turkey (all you can eat), yams, Mexican corn, fresh baked rolls, homemade cole slaw and homemade tomato salad, plus drink and dessert. Serving will begin at 4 p.m. and continue to 7:30 p.m. Rotarians serve the meal. Assisting Coscia, who is a restaurateur, caterer

and food service manager at the Westmoreland Club, are Perry Karnofsky, operator of Bartikowsky Restaurant Supplies, and John Barney, UGI Corp. All of the other Dallas Rotary clubmembers assist the three-man committee. Proceeds from the affair support local charities of the Rotary Club.

Advance tickets may be purchased from any Rotarian or at the offices of The Dallas Post, 44 Main St.

## HLWSC invites new members

The Harvey's Lake Women's Service Club is conducting a membership drive. The club has as its purpose the advancement of community welfare, the development of the educational, civic and social interests of its members and the promotion of the progress and work of the Pennsylvania Federation of Women's Clubs (PFWC). # GET AN ADD-ON HEAT PUMP & ADD UP YOUR ENERGY SAVINGS.

Are you aware of the advantages of the electric heat pump?

This amazingly efficient system can warm your home with heat it extracts from outdoor air, even in midwinter. And it cools your home in summer like an air conditioner. Regardless of the fuel you use, if you have a warm-air heating system, you can enjoy the savings of heat pump efficiency. Just install an add-on heat pump to operate in combination with your present system. Heat pumps operate more efficiently when outdoor temperatures are 35°F or higher. Below 35°, supplemental heat must be added from another source. By using an add-on heat pump with your present system, both heating sources will operate at their maximum efficiency, thereby reducing overall energy consumption and lowering your heating costs.

The add-on heat pump will supply much of your heating needs throughout fall, winter, and spring. Then —when summer comes—you'll have central air conditioning supplied by your electric heat pump. And of course there are still more savings possible —by using UGI's optional Time-of-Use rate (Rate RTU). To learn how an add-on heat pump can benefit you, call UGI at 283-0611 or Enterprise 10636.
