## Borrowdale riders in Pittston olympics

Borrowdale Acres Exceptional Riders' Club of Dallas, recently participated in the Area Special Olympics Meet at Pittston High School.

Riders presented an equitation demonstration, in which they were judged on their position and seat, their use of aids and their general impression at the walk and/or the sitting trot.

First place in that

division went to John Paul Bielecki, Wilkes-Barre, second place—David Galli, Pittston and third place Sherry Pudim, Exeter.

The riders exhibited improved balance, coordination and concentration, when they negotiated an obstacle course, which included weaving through pylons, walking over poles, and riding with an egg

balanced on a spoon.

Sherry Pudim placed first in that division, with John Paul Bielecki second and David Galli, third.

The youngest riders where all thrilled by the way hours of clipping, trimming and braiding had transformed their usual school horses into show prospects.

The club thanked Lois Gonzalez, Mrs. Carol Malig and Georgann C.

Kostenbauder for preparing the animals; Mrs. Dixon's Cadette Girl Scout Troop 715 and Round-about 4-H Club for providing leaders and side-walkers; and especially Margie Bart for providing the trailer to transport animals on very short notice.

The young, mentally-retarded equestrians proved themselves champions

## Kingston Twp.

J.A. and W.H. Hess, Inc., Hazleton, base bid \$105,208.63, alternate of \$5,300, total of \$110,508.63 and no bid for beams; B.J. Coon Construction, base bid of \$95,990.54 and alternate of \$1,816.00 for total of \$97,806.54, beams \$25,000 additional.

Seven Brothers, Clarks Summit, submitted a base bid of \$80,852.05 and alternate of \$1,126 for a total of \$81,978.05 and \$20,790 for beams; Wyoming Sand and Stone base bid was \$73,979.50 and alternate \$930 totaling \$74,909.50 with no amount quoted for beams. Bradaric Excavating bid \$93,567.72 and alternate of \$1,510 for a total of \$95,077.72 and \$23,000 for pre-stressed beams. American Asphalt, \$94,197.05 and alternate of \$1,1558 for total of \$95,352.05. No price for beams was included.

Price said the township was prepared as of recently to go \$75 to \$80,000 "tops" including the engineering fee of almost \$10,000. As an aside, the engineering fee on this project has raised more than a few eyebrows of community members when the charge was announced at a meeting a few months ago.

One township political participant observing from the sidelines commented "It sure costs a lot these days to study a bridge built over a creek you can skip across."

The determination as to the total cost is of utmost importance to the township residents as there are no grant monies involved. Every phase is being financed by the local tax effort. As only a specified amount was budgeted for the

project, it remains to be seen as to how the town fathers will bridge the gap financially as the "cross that bridge when we come to it" deadline is running out.

Supervisors were asked why they are not conducting a spring clean up while Dallas Township is. Supervisors Gavigan and Wisniewski insisted the landfill could not accommodate any more clean-up debris, and wondered where Dallas Township is dumping its refuse.

Told the Dallas Township supervisors said at their meeting Tuesday they would use the West Side Landfill, the supervisors were perplexed. It turned out that Dallas Township intended to use the West Side Landfill as late as their Tuesday meeting, but were informed they could not do so shortly after the meeting.
