

WINTER'S

# SAVE HOME ENERGY

ON ITS WAY!

1. Look into the fuel saving benefits of solar energy.
2. The new, high efficiency oil burner reclaims heat.
3. Keeping thermostats lower can save you on fuel costs.
4. Storm windows reduce heat loss and monthly fuel bills.

5. Windmills can produce enough power to service utility bills.
6. Multi-fuel energy converters can cut costs by a big margin.
7. Auxiliary heating aids in your monthly fuel savings.
8. Lined draperies can act as added insulation in the home.

9. Increase the amount of present insulation to fit recommended levels.

**The forecast says cold ahead, so let us fuel the fire of your Save Home Energy Plans.**
