

your **Lawn-A-Mat** man  
will give you a good looking  
lawn this year for less  
than do-it-yourself prices!

## AERATION

Our power aeration equipment makes thousands of "breathing" holes in the turf, channeling moisture, air, nutrients, and insect controls directly to the root zone, where they do the most good. Aeration relieves compaction of baked soil, typical of dry spells, lets each grass plant expand vigorously and withstand water shortage and disease. In conjunction with our super soaker this offers the maximum method of providing natural moisture to reach the deep rooted zone.

## SEEDING

Utilizing Only  
State Certified And  
Sod Master Qualities

We use only certified quality seed. Certified is not a brand name, but rather it is a measure of quality certified to be the purest and best quality money can buy for your lawn.

## TIME TESTED EXPERIENCE

This may be the most important factor of all. Knowing **WHEN** and **HOW** is as vital as knowing **WHAT** to do. Your Lawn-A-Mat Professionals are "old hands" with hundreds of years of combined experience and training to bring to your lawn. Although we utilize the most advanced products of the research laboratories, good old fashioned know-how is still our most important asset. It's a big reason behind our claim that your Lawn-A-Mat man can give you a better lawn . . . **FOR LESS THAN IF YOU DO-IT-YOURSELF.**

## ORGANIC FERTILIZERS CONTROLLED DRY GRANULAR

A combination of slow acting time released and fast acting released **GRANU-**

**LARS** that drop to the soil surface and are taken into the grass plant through the root system, **NATURES WAY.** **ORGANIC** Dry fertilizer Granulars ration the feeding for regular and sustained growth. Plus, its non-burning qualities mean it's **SAFE** even during the hottest months of summer.

**Dry  
Granular  
Fertilizers**

We use complete formulas —  
Nitrogen — Phosphorous — Potash — trace elements, etc.
