Financial aid is available

Each January millions of prospective and enrolled students begin applying for financial aid to help pay for college or technical school. Financial help is made available through federal aid programs, state and college-funded programs, and a variety of special programs funded by businesses, religious affiliations, minority organizations, the armed forces, service clubs, career organizations and more.

Financial aid is designed to cover costs above and beyond what students can afford to pay and eligibility is determined by a number of factors. The size of the student's family, income, cost of tuition, room and board, and other variables affect the amount of aid awarded to a student.

Aid comes in the form of grants and scholarships that do not have to be repaid, loans that must be repaid after the student graduates or leaves school, and work-study programs in which a student works in order to earn a pre-determined amount of aid.

The aid application form used most often by Pennsylvania residents is the combined form used for both the Pennsylvania State Grant and the Federal Student Aid needs assessment. Other forms used include the application for Federal Student Aid, the Family Financial Statement, and the Financial Aid Form. The combined form is helpful in that it is used to determine eligibility for both state and federal aid programs.
