Are you concerned about chemicals
in the water?

You have every right to be concerned about this
contaminant in your tap water. In fact, in this area, this
particular pollutant was found to be in the water at
unsafe levels.

You cannot control the safety of your tap water, but you can
make your own pure water at home. With a Pure Water
home distiller, you can have safe, pure water. Water that is
virtually free from
and all other
contamination.

For free information or a FREE water comparison
test, send in the attached coupon.
