Rx for Flu or Chicken Pox: Kindness

Be good to yourself when you've got the flu or chicken pox. Take it easy. Get plenty of rest.

Viral illnesses such as these are usually self-limiting. Time will cure them.

Check with your doctor about using medications to treat flu or chicken pox. For children—including teenagers—medications such as aspirin and aspirin-containing products may not be a good idea. A rare but dangerous condition called Reye syndrome may develop in young people just when they appear to be recovering. Studies suggest a link between the development of Reye and the use of aspirin to treat the flu or chicken pox.

So, treat yourself right when you've got the flu!
