PSU teams accepted into EPJCC

Baseball, men's tennis and women's volleyball teams from the Wilkes-Barre Campus of The Pennsylvania State University have been accepted into EPJCC (Eastern Pennsylvania Junior College Conference), beginning with the 1986-87 season.

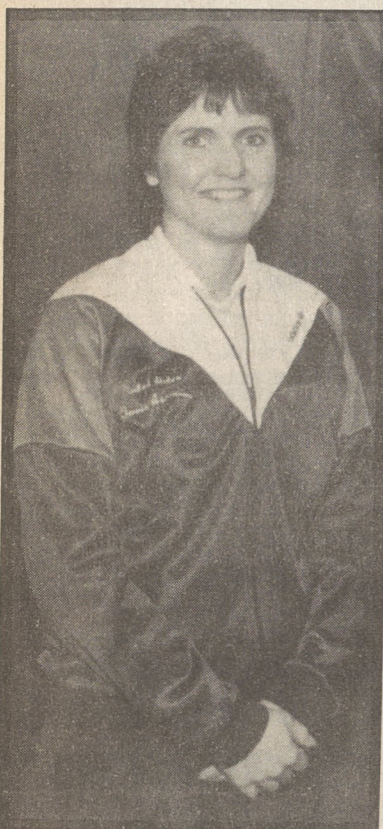

According to Jack Monick, athletic director, this affiliation with a strong state-wide conference opens the possibility for Penn State Wilkes-Barre teams to compete for regional and state championships. He believes that playing against tougher opponents will do much to strengthen the athletic program.

John Murphy, director of student programs and services, said the athletic department will maintain its "priority commitment" to the Commonwealth Campus league. At the same time, it will pursue the goal of becoming involved in other sports sponsored by EPJCC.

"This is a statement as well as an action," said Dean Murphy. "It's a step in upgrading our athletic program."

He pointed out that the position of athletic director had been created in the past year and that the plans were under discussion for additional varsity sports to be added to the program in concurrence with the completion of a physical education building on campus.

EPJCC is composed of teams from Bucks County Community College, Delaware County Community College, Lehigh County Community College, Luzerne County Community College, Montgomery County Community College, Northampton County Community College, Philadelphia County Community College, Ogonz Campus of Penn State and Penn State Wilkes-Barre.

LAURA CANFIELD

Dallas native is named to tennis post

Helping to bring tennis to all elementary and junior high school students in the Eastern section of the United States is the goal for Laura Canfield originally from Dallas, who was just named Sectional Schools Director by the United States Tennis Association (USTA).

As a Sectional Schools Director, Laura will travel throughout the state of New York and sections of Connecticut and New Jersey, presenting the USTA Schools Program to interested communities. By bringing together representatives from the schools, park and recreation department and local tennis groups, the USTA Schools Program provides elementary and junior high school students with an opportunity to be introduced to tennis during their physical education class. Those students who enjoy the sport can continue their newfound interest in after-school and summer tennis programs. The USTA Schools Program, now in its third year, will reach approximately 600,000 students by the end of the 1985-86 school year.

Laura is a graduate of East Stroudsburg University with a bachelor of science degree in recreation and leisure service management. She also received her masters degree in sport management from the University of Massachusetts. Laura brings a background of tennis teaching, competing, tournament coordinating and reporting to this new position. Before joining the USTA staff, Laura was the circulation manager at Tennis Week magazine. She has also held the position of tournament coordinator for Sports Investors, Inc. Laura will work out of the Eastern section office of the USTA, located in White Plains.

This year the USTA has hired eight new Sectional Schools Program Directors. Previously, just three USTA sections had schools directors on a full-time basis. "The dramatic growth of tennis in the schools in these three sections made the expansion of the program a natural for the USTA," said Larry Tabak, Coordinator of the USTA Schools Program. "Our goal is to eventually have a director in all 17 USTA sections," he added.

For further information on starting a USTA Schools Program in your school system, contact Laura at the Eastern section office at 914-946-3533, or the USTA Center for Education and Recreational Tennis, 729 Alexander Road, Princeton, New Jersey 08540, or call (609) 452-2580.
