

SCHOOL

Can't get to school? LCCC to offer courses by television

For those who are unable to enroll in scheduled college courses, and are interested in earning college credit at home, the Luzerne County Community College Tele-College program has designed a number of telecourse offerings for its Spring semester.

By registering for telecourses, students are able to learn at home, without attending regularly scheduled classes. LCCC telecourses combine television lessons, reading assignments, one or more on-campus discussion sessions, review for exams, or alternate assignments.

This Spring, LCCC will offer seven telecourses on WVIA-TV, Channel 44, as part of a nationwide Public Broadcasting Service Adult Learning Program. The telecourses include English Composition I, American History Since 1865, Introduction to Contemporary Mathematics, Principles of Sociology, History of Civilization II, Principles of Economics II (Micro),

and The Family.

In addition to the telecourses which will be broadcast on Channel 44, 16 independent study telecourses will also be offered. The independent study telecourses are available for viewing in the LCCC Program Study Center. Offerings include Principles of Marketing I, Personal Money Management, Principles of Management, Business Law II, Principles of Economics I (Macro), Introduction to Poetry, and History of the English Language.

Also, American Civil Rights Movement, Vietnam, World War II: Parts I and II, Personal and Community Health, Descriptive Astronomy, The Constitution, General Psychology, and The Brain: Mind and Behavior.

For more information on the Spring course offerings or the Tele-College program at LCCC, call Eleanor Miller, TeleCollege coordinator, at 829-7423.

Lake-Lehman students access Penn State libraries

Books, magazines, tapes - all the treasures of the Penn State University libraries - are now at the beck and call of Lake-Lehman students and faculty.

Lake-Lehman has become the first area school district to respond to Penn State Wilkes-Barre Campus' invitation to tie-in with Penn

State's Library Information Access System (LIAS) which the Wilkes-Barre campus library to the many libraries at University Park and at the Commonwealth campuses.

According to Joan Diana, Penn State Wilkes-Barre librarian, this is part of an on-going "Partnership in Education" program.

Misericordia plans new student housing

College Misericordia plans to break ground for new student housing in March, 1990, said Tom O'Neil, dean of financial and administrative affairs.

The six to 12 townhouse units, housing from 24 to 48 students, may be built in the grove of trees across from the Administration Building, he said. The townhouses should be completed in time for the 1990-91 school year.

"We really need the space," O'Neil noted. "We'll bring the 10 students

out of the Lake Street houses, and the rest of the space will house our growing resident population."

Currently, about 430 students live in Misericordia's three residence halls and two houses on Lake Street. Misericordia's total enrollment is about 1,300 undergraduate, graduate and part-time students.

The furnished townhouses, estimated to cost between \$500,000 and one million dollars, will be built from plans the College has

Seminary students visit TV station

The second grade class at Wyoming Seminary Lower School, Forty Fort, recently visited the studios of WNEP-TV, Channel 16. They were given a tour where they visited the news set, newsroom, and "Backyard" weather set.

Area students named to Wyoming Sem Dean's List

Carmen Marnell, Dean of Wyoming Seminary College Preparatory School, Kingston recently announced the students named to the Dean's List High Honors and the Dean's List for the first trimester of the 1989-90 school year. Area students gaining honors were:

Dean's List High Honors: Danielle Baker, Dallas; David Choi, Dallas; Gregory Choi, Shavertown; Laura D'Anca, Shavertown; Joanna Garbush, Shavertown; Jennifer Harding, Tunkhannock; Roy Harvey, Tunkhannock; Janelle Kellman, Shavertown; Brian Koo, Dallas; Jeana Oh, Dallas; Kristin Roberts, Dallas; Lenna Shah, Dal-

las; Janice Shynn, Shavertown. Dean's List: Amy Brown, Dallas; Corine Casterline, Dallas; Kim Ertley, Dallas; Courtney Feldman, Shavertown; Carrie Isaacs, Trucksville; Dylan Jones, Dallas; Christopher Kersey, Shavertown; Stephen Kimm, Shavertown; Jeffrey Malak, Shavertown; Michael Mooney, Dallas; Laurel Moore, Shavertown; Scott Moore, Shavertown; Jennifer Mugford, Dallas; Ashish Patel, Shavertown; Jennifer Roberts, Dallas; Durrelle Scott, Dallas; Raymond Shynn, Shavertown; William Sordoni, Harvey's Lake; Allyson Turner, Shavertown; Sanjay Udoshi, Dallas; Susan Valentine, Dallas.

School menus

LAKE-LEHMAN SCHOOLS

Jan. 2 - 3
TUESDAY - Hot dog on bun, mashed potatoes, steamed sauerkraut, peaches, milk.
WEDNESDAY - Spiral macaroni w/Italian meat sauce, seasoned broccoli, roll-butter, ice cream, milk.

WEST SIDE TECH

Jan. 2 - 3
 Breakfast

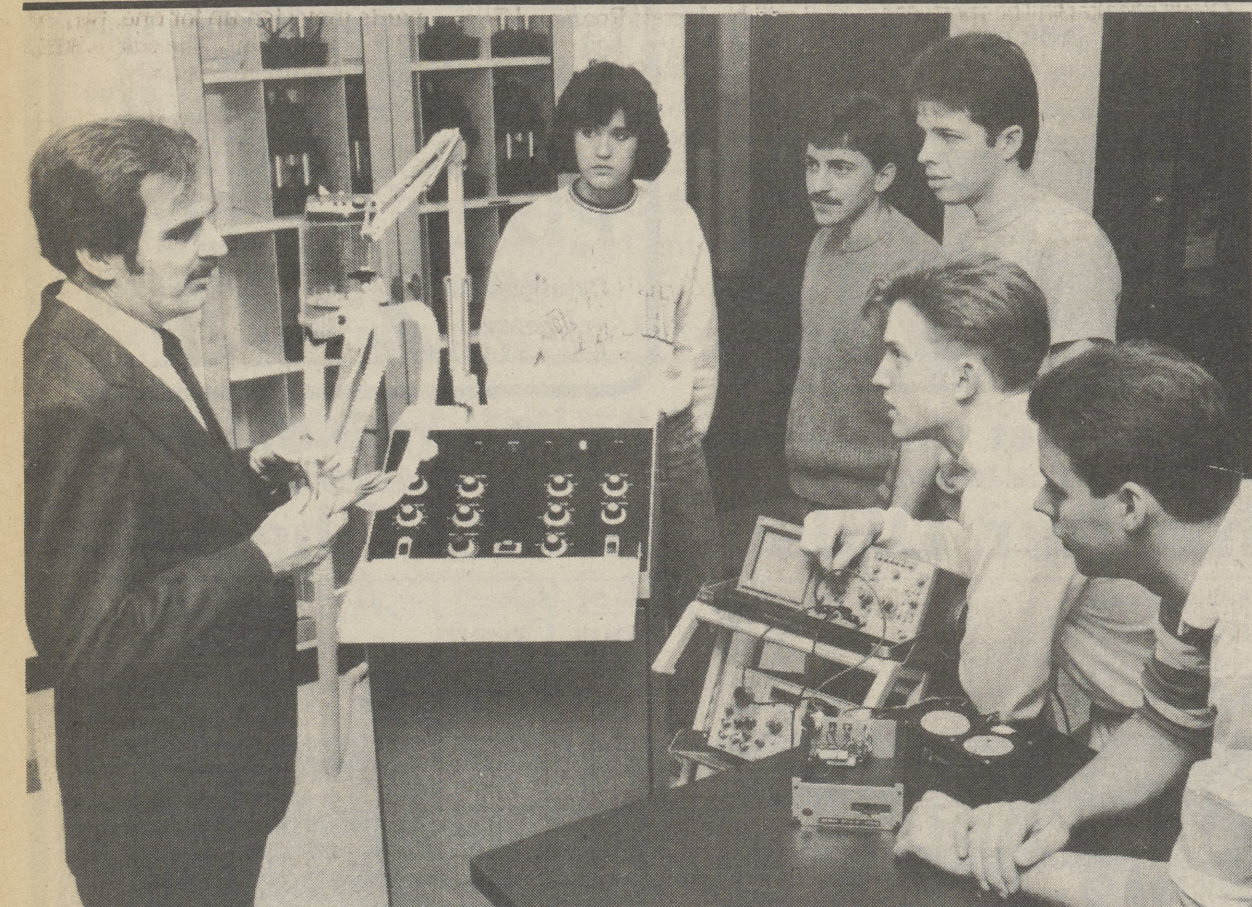

TUESDAY - Variety of cereal, blueberry muffin, chilled fruit juice, milk.

WEDNESDAY - Apple nut muffin, choice of cereal, orange wedges, milk.

Lunch
TUESDAY - Hamburg on bun w/onion-relish-salad dressing, chicken noodle soup-crackers, pudding, peaches, milk.

WEDNESDAY - Italian meatballs w/tomato sauce on hard roll, green beans, vanilla cake, milk.

Extra copies of The Dallas Post's 100th Anniversary edition are still available. Call or stop by our office in the 309-415 Plaza to order yours. 675-5211.

PENN STATE/NAVY PROGRAM - Dr. Richard Aston, associate professor of biomedical equipment technology at Penn State Wilkes-Barre demonstrates the operation of medical equipment to students in the Navy RAMP program. The Navy pays full tuition and book costs for students who enter the two-year associate degree program for biomedical equipment technologists. Shown with Dr. Aston from left are Cecelia Peters of Sweet Valley; Dave Green of Dallas; Don Gregoire of Owego, N.Y.; Chris Szlucha of Owego, N.Y.; Glen Hill of Dallas.

Navy program developed at local Penn State campus

The United States Navy and Penn State Wilkes-Barre have teamed up to provide Northeast Pennsylvania with a dynamic and challenging new job opportunity.

Penn State Wilkes-Barre is an approved facility for teaching biomedical equipment technicians for the Naval Reserve Allied Medical Personnel Program (RAMP). The first class graduated in August after completing their 10-week internship.

Developed at the Wilkes-Barre campus, the two-year associate degree program in Biomedical Equipment Technology (BMET), teaches the installation, calibration, preventive maintenance and repair of hospital equipment. There are currently 12 Naval Reserve recruits enrolled in the program.

RAMP is an extension of the Sea and Air Mariner (SAM) Program, which pays full tuition and book costs for students when they study certain medical specialties at Navy-approved institutions. High school graduates and persons about to graduate within the age limits, 17 to 26, are eligible to apply.

For students Chris Szlucha and Dan Gregoire, both of Owego, NY,

the Penn State Wilkes-Barre/RAMP program provided the perfect opportunity for the high school friends to train together.

Their Navy recruiter arranged for them to go to boot camp together in Orlando, Florida, on the buddy system, and now they take class side-by-side in the biomedical lab at the Wilkes-Barre campus.

"Don and I have grown up together and it is nice having someone to go through with you," said Szlucha. "I love how the faculty here are very accessible," he added. He plans to work at a Navy hospital for awhile, and then continue his education in aerospace engineering.

Graduates of Penn State Wilkes-Barre's BMET program have highly marketable skills and have close to 100% job placement. According

to Margie Esopi, assistant director of Student Programs and Services at the campus, graduates of the program often head hospital biomedical equipment departments. She commented that BMETs work in hospitals in almost every com-

had for several years. Each unit will have two floors, a living room, kitchen, four bedrooms and one half baths, for a total of 1,240 square feet.

The Buildings and Grounds Committee should decide soon on whether the townhouses will be of pre-fabricated, wooden construction, or a combination masonry-wood construction, O'Neil said.

Bids for the project are expected to go out to local and area contractors in January.
