Pennsylvania AT&T Relay Service, 1-800-654-5984 (TDD).

Holograms appear at Everhart

A whole new exhibit of those magical holograms will be shown through August 22. Holography: Light Dreams II will feature a whole new array of holograms that have never been seen before.

If you missed the last show, this is your chance to experience, first hand, holography's ability to make a three dimensional object appear in two dimensions. Holography blends conventional photography and laser light to make the impossible appear possible...a Peregrine Falcon appears ready for flight. Unfortunately, a photograph cannot recreate the dimensional qualities of a hologram. They have to be seen first hand.

There is an admission fee for the general public of \$2 for adults and \$1 for children.

The Everhart Museum receives major funding from the City of Scranton, Lackawanna County and the Commonwealth of Pennsylvania. Hours: Tues.-Fri. 10 a.m.-5 p.m.; Sat.-Sun., noon-5 p.m. Closed Mondays.

MAGIC OR SCIENCE? - The Everhart Museum in Scranton is showing "Holography: Light Dreams II" through August 22.

AN EQUAL OPPORTUNITY LENDER

For the past few years, more and more pool owners have switched to chlorine-free BAQUACIL swimming pool sanitizer and algicide. Because they're tired of chlorine problems, chlorine odor, and chlorine work.

After they switch, 93% of the BAQUACIL families say they're happy they did. What they discover: BAQUACIL is more stable than chlorine. So you need to test less often. Just once a week.

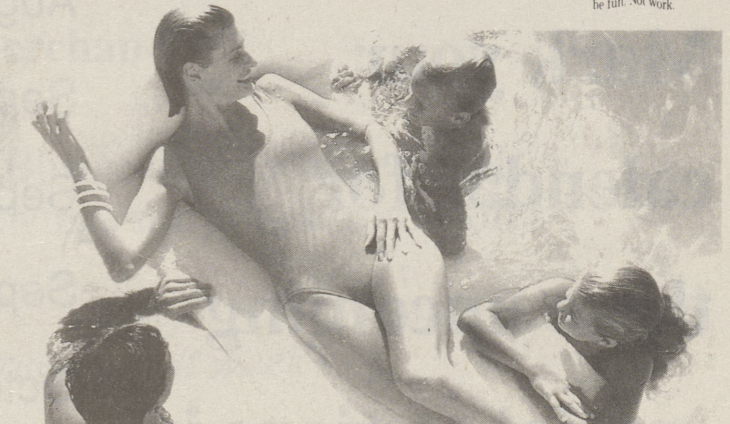

BAQUACIL lasts longer. So you need to add it less often. Just once every week or two.

You can shock and scrub in maybe ten minutes. Not maybe two hours.

Bottom line: sparkling clear water with less work for you. More time for fun.

BAQUACIL is the original chlorine-free system of pool water treatment. And no dealer knows more about it than an Authorized BAQUACIL Dealer. Or has more confidence in the chemistry.

Stop by the dealer near you and see how chlorine-free BAQUACIL can keep you 100% satisfied.
