

## Dallas High hosts teachers' workshop

Dallas High School recently hosted a meeting of educators from Wilkes University and the Dallas School District in recognition of the high school's leadership in the Professional Awareness for Cooperating Teachers (PACT) initiative.

The PACT program was developed by Wilkes University and public school educators in 1990 to update techniques for preparing college students to become teachers.

The graduate-level course at

Wilkes University opens channels of communication between the university and the local public schools, encouraging public school teachers to refine their training of university students completing student teaching with them.

Public school administrators have expressed their support for their staff members' participation by letters of recommendation submitted to the university. The contemporary plan is one in which the student teacher, the PACT

cooperating teacher, and the school principal coordinate efforts and energies each day for the benefit of students.

Student teaching for Wilkes students at Dallas now is a coherent effort of cooperating teacher and university. The careful coordination of public school standards and university goals provides a highly refined experience for both the student teacher and the public school students, all under the supervision of veteran educators.

Secretary of the Navy John H. Dalton was on hand to welcome the crews home from their six-month deployment and presented the award while many of the 6,000 sailors and Marines on board the Theodore Roosevelt watched the ceremony as it was broadcast over the aircraft carrier's closed-circuit television.
