Are You At Risk For Heart Disease?

Find the answer at the **Second Annual Cardiac Care Lecture Series "Findings of the Framingham Heart Study"**

Tuesday, May 23, 1995, 7:00 p.m.
F.M. Kirby Center for the Performing Arts
Guest Speaker: William P. Castelli, M.D.,
Past Director, Framingham Heart Study

What factors put *you* at risk for heart disease? Diet? Exercise? Heredity?

Get the facts and fascinating insight into heart disease from Dr. William P. Castelli, who for the past 16 years served as Director of the Framingham Heart Study - the world's longest-running heart study.

Based in Framingham, Massachusetts since 1948, the study has been described as "a national treasure" for its key findings on the roles played by such factors as cholesterol, blood pressure, smoking, obesity and physical exercise in causing or preventing heart disease and stroke.

Dr. Castelli's contributions have been honored by numerous awards, including the Meritorious Service Medal from the United States Public Health Service and the Paul Dudley White Award from the Massachusetts affiliate of the American Heart Association.

Reservations are limited, so please arrange for your tickets today by calling 283-7222 or 1-800-838-WELL.

A special presentation co-sponsored by Wyoming Valley Health Care System and George E. Cimochoowski, M.D., Chief of Cardiac Surgery, Wilkes-Barre General Hospital Campus.
