## Pain may be eliminated for millions

(SPECIAL)-- A new drug has been approved that is exciting researchers in the treatment of pain. This material has been formulated into a new product known as "Arthur Itis<sup>™</sup>" and is being called a "Medical Miracle" by some, in the treatment of debilitating conditions such as arthritis, bursitis, rheumatism, painful muscle aches, joint aches, simple backache, bruises, and more. Although the mechanism of action is unclear, experiments indicate that Arthur Itis<sup>™</sup> relieves pain by first selectively attracting, and then destroying the messenger chemical which carries pain sensations to the brain, thus eliminating pain in the affected area. Arthur Itis<sup>™</sup> is an odorless, greaseless, non-staining cream and is available immediately without a prescription and is guaranteed to work. Use only as directed.
